<http://www.vustudents.net>

VUSTUENTS.NET is a community formed to overcome the disadvantages of distant learning and virtual environment, where pupils don't have any formal contact with their mentors, This community provides its members with the solution to current as well as the past Assignments, Quizzes, GDBs, and Papers. This community also facilitates its members in resolving the issues regarding subject and university matters, by providing text e-books, notes, and helpful conversations in chat room as well as study groups. Only members are privileged with the right to access all the material, so if you are not a member yet, kindly SIGN UP to get access to the resources of VUSTUDENTS.NET

STA301- MCQs:

Question No: 21 (Marks: 1)

_____ If
 $P(X=0) = \frac{1}{8}$, $P(X=1) = \frac{3}{8}$, $P(X=2) = \frac{3}{8}$ and $P(X=3) = \frac{1}{8}$
Then find $F(1)$

Question No: 22 (Marks: 2)

_____ Write down
the formula of mathematical expectation.
 $e = (w * p) + (-v * 1) . e$

Question No: 23 (Marks: 3)

_____ Discuss the
statistical independence of two discrete random variables:

Question No: 24 (Marks: 3)

_____ For given
data calculate the mean and standard deviation of sampling distribution of mean if the
sampling is down *without* replacement.
 $N = 1000, n = 25, \mu = 68.5, \sigma = 2.7$

Question No: 25 (Marks: 3)

_____ Elaborate the
Least Significant Difference (LSD) Test.

Question No: 26 (Marks: 3)

_____ State the
Bayes' Theorem.

Question No: 27 (Marks: 5)

_____ The means and variances of the weekly incomes in rupees of two samples of workers are given in the following table, the samples being randomly drawn from two different factories:

Factory	Sample Size	Mean	Variance
A	160	12.80	64
B	220	11.25	47

Calculate the 90% confidence interval for the real difference in the incomes of the workers from the two factories.

Question No: 28 (Marks: 5)

_____ From the given data $n = 1340, x = 723, p = .54$ and $H_0 : P_0 = 0.5$ against $H_1 : P_0 \neq 0.5$. Carry out the significance test for the stated hypothesis.

Question No: 29 (Marks: 5)

_____ Given the Probability density function

$$f(x) = \begin{cases} \frac{x}{2}, & \text{for } 0 \leq x \leq 2 \\ 0, & \text{elsewhere} \end{cases}$$

Compute the distribution function F(x).

Question No: 30 (Marks: 10)

$$f(x,y) = \frac{1}{8}(6 - x - y), 0 \leq x \leq 2; 2 \leq y \leq 4, \\ = 0, \text{ elsewhere}$$

a) Verify that f(x,y) is a joint density function.

$$P\left(X \leq \frac{3}{2}, Y \leq \frac{5}{2}\right),$$

b) Calculate

Question No: 31 (Marks: 10)

Let X_1, X_2, X_3 be a random sample of size 3 from a population with mean μ and variance σ^2 . Consider the following two estimators of the mean

$$T_1 = \frac{X_1 + X_2 + X_3}{3}$$

$$T_2 = \frac{X_1 + 2X_2 + X_3}{4}$$

Which estimator should be preferred?

Question No: 1 (Marks: 1) - Please choose one

For a particular data the value of Pearson's coefficient of skewness is greater than zero. What will be the shape of distribution?

- ▶ **Negatively skewed**
- ▶ J-shaped
- ▶ Symmetrical
- ▶ Positively skewed

Question No: 2 (Marks: 1) - Please choose one

In measures of relative dispersion unit of measurement is:

- ▶ **Changed**
- ▶ Vanish
- ▶ Does not changed
- ▶ Dependent

Question No: 3 (Marks: 1) - Please choose one

The F-distribution always ranges from:

- ▶ 0 to 1
- ▶ 0 to $-\infty$
- ▶ $-\infty$ to $+\infty$
- ▶ **0 to $+\infty$**

Question No: 4 (Marks: 1) - Please choose one

In chi-square test of independence the degrees of freedom are:

Come & Join Us at www.vustudents.net

- ▶ $n - p$
- ▶ $n - p - 1$
- ▶ $n - p - 2$
- ▶ $n - 2$

Question No: 5 (Marks: 1) - Please choose one

The Chi-Square distribution is continuous distribution ranging from:

- ▶ $-\infty \leq x^2 \leq \infty$
- ▶ $-\infty \leq x^2 \leq 1$
- ▶ $-\infty \leq x^2 \leq 0$
- ▶ $0 \leq x^2 \leq \infty$ 348

Question No: 6 (Marks: 1) - Please choose one

If X and Y are random variables, then $E(X - Y)$ is equal to:

- ▶ $E(X) + E(Y)$
- ▶ $E(X) - E(Y)$
- ▶ $X - E(Y)$
- ▶ $E(X) - Y$ answr

Question No: 7 (Marks: 1) - Please choose one

If \hat{y} is the predicted value for a given x-value and b is the y-intercept then the equation of a regression line for an independent variable x and a dependent variable y is:

- ▶ $\hat{y} = mx + b$, where m = slope
- ▶ $x = \hat{y} + mb$, where m = slope
- ▶ $\hat{y} = x/m + b$, where m = slope
- ▶ $\hat{y} = x + mb$, where m = slope

Question No: 8 (Marks: 1) - Please choose one

The location of the critical region depends upon:

- ▶ Null hypothesis
- ▶ Alternative hypothesis
- ▶ Value of alpha
- ▶ Value of test-statistic

Question No: 9 (Marks: 1) - Please choose one

Come & Join Us at www.vustudents.net

The variance of the t-distribution is given by the formula:

▶
$$\sigma^2 = \sqrt{\frac{v}{v-2}}$$

▶
$$\sigma^2 = \frac{v^2}{v-2}$$

▶
$$\sigma^2 = \frac{v}{v-1}$$

▶
$$\sigma^2 = \frac{v}{v-2}$$

Question No: 10 (Marks: 1) - Please choose one

Which one is the correct formula for finding desired sample size?

▶
$$n = \left(\frac{Z_{\alpha/2} \cdot \sigma}{e} \right)^2$$

▶
$$n = \left(\frac{Z_{\alpha/2} \cdot \sqrt{\sigma}}{e} \right)^2$$

▶
$$n = \left(\frac{Z_{\alpha/2} \cdot \bar{X}}{e} \right)^2$$

▶
$$n = \frac{Z_{\alpha/2} \cdot \sigma}{e}$$

Question No: 11 (Marks: 1) - Please choose one

A discrete probability function f(x) is always:

- ▶ Non-negative
- ▶ Negative

▶ One

▶ Zero

Question No: 12 (Marks: 1) - Please choose one

$E(4X + 5)$

= _____

▶ $12 E(X)$

▶ **$4 E(X) + 5$**

▶ $16 E(X) + 5$

▶ $16 E(X)$

Question No: 13 (Marks: 1) - Please choose one

How $P(X + Y <$

1) can be find:

▶ $f(0, 0) + f(0, 1) + f(1, 2)$

▶ $f(2, 0) + f(0, 1) + f(1, 0)$

▶ $f(0, 0) + f(1, 1) + f(1, 0)$

▶ $f(0, 0) + f(0, 1) + f(1, 0)$

Question No: 14 (Marks: 1) - Please choose one

The

$f(x|1) =$

_____:

▶ $f(1,1)$

▶ $f(x,1)$

▶ $\frac{f(x,1)}{h(1)}$

▶ $\frac{f(x,1)}{h(x)}$

▶

Question No: 15 (Marks: 1) - Please choose one

The area

under a normal curve between 0 and -1.75 is

Come & Join Us at www.vustudents.net

▶ **.0401**

▶ .5500

▶ .4599

▶ .9599

Question No: 16 (Marks: 1) - Please choose one

_____ In normal distribution M.D. =

▶ **0.5σ**

▶ 0.75σ

▶ 0.7979σ

▶ 0.6445σ

Question No: 17 (Marks: 1) - Please choose one

_____ In an ANOVA test there are 5 observations in each of three treatments. The degrees of freedom in the numerator and denominator respectively are.....

▶ 2, 4

▶ 3, 15

▶ 3, 12

▶ **2, 12**

Question No: 18 (Marks: 1) - Please choose one

_____ A set that contains all possible outcomes of a system is known as

▶ Finite Set

▶ Infinite Set

▶ Universal Set

▶ **No of these**

Question No: 19 (Marks: 1) - Please choose one

_____ is more informative when data is : Stem and leaf

▶ Equal to 100

▶ Greater Than 100

▶ Less than 100

▶ **In all situations**

Question No: 20 (Marks: 1) - Please choose one

_____ A population that can be defined as the aggregate of all the conceivable ways in which a specified event can happen is known as:

- ▶ Infinite population
- ▶ Finite population
- ▶ Concrete population
- ▶ **Hypothetical population**

In a multiplication theorem $P(A \text{ and } B)$ equals:

▶ **Select correct option:**

- $P(A) P(B)$
- $P(A) + P(B)$
- $P(A) * P(B|A)$
- $P(B|A)*P(B)$

The probability can never be:

▶ **Select correct option:**

- 1
- 1/2
- 1
- 1/2

If two fair die are thrown, the probability of getting a double six is:

▶ **Select correct option:**

- 1/6
- 2/36
- 1/36
- 1/12

If A and B are independent events with $P(A) = 0.05$ and $P(B) = 0.65$, then $P(A | B) = :$

▶ **Select correct option:**

- 0.65
- 0.05
- 0.03
- 0.07

Twenty percent of the students in a class of 100 are planning to go to graduate school. The standard deviation of this binomial distribution is:

▶ Select correct option:

- 20
- 2
- 4
- 16

If $f(x)$ is a continuous probability function, then $P(X = 2)$ is:

▶ Select correct option:

- 1
- 0
- 1/2
- 2

Probability of an impossible event is always:

▶ Select correct option:

- Less than one
- Greater than one
- Between one and zero
- Zero

Question # 8 of 10 (**Start time: 01:38:25 PM**) Total Marks: 1

$E(4X + 5) =$ _____

▶ Select correct option:

- 12 E (X)

$4 E (X) + 5$

$16 E (X) + 5$

$16 E (X)$

The location and shape of the normal curve is (are) determined by:

▶ Select correct option:

Mean

Variance

Mean & variance

Mean & standard deviation

The probability of success changes from trial to trial, is the property of:

▶ Select correct option:

Binomial experiment

Hypergeometric experiment

Both binomial & hypergeometric experiment

Poisson experiment

Question No: 1 (Marks: 1) - Please choose one

_____ Mean deviation is always:

- ▶ Less than S.D
- ▶ Greater than S.D
- ▶ Greater or equal to S.D
- ▶ Less or equal to S.D

Question No: 2 (Marks: 1) - Please choose one

_____ The value of χ^2 can never be :

- ▶ Zero
- ▶ Less than 1
- ▶ Greater than 1
- ▶ Negative

Question No: 3 (Marks: 1) - Please choose one

The mean of the F-distribution is:

▶ $\frac{v_1}{v_1 - 2}$ for $v_1 > 2$

▶ $\frac{v_2}{v_2 - 2}$ for $v_2 > 2$

▶ $\frac{v_1}{v_1 - 2}$ for $v_1 \geq 2$

▶ $\frac{v_2}{v_2 - 2}$ for $v_1 \leq 2$

Question No: 4 (Marks: 1) - Please choose one

If X and Y are random variables, then $E(X - Y)$ is equal to:

▶ $E(X) + E(Y)$

▶ $E(X) - E(Y)$

▶ $X - E(Y)$

▶ $E(X) - Y$

Question No: 5 (Marks: 1) - Please choose one

Evaluate: $(9-4)!$

▶ 362880

▶ 120

▶ 24

▶ 6

Question No: 6 (Marks: 1) - Please choose one

Which formula represents the probability of the complement of event A:

▶ $1 + P(A)$

▶ $1 - P(A)$

▶ $P(A)$

▶ $P(A) - 1$

Question No: 7 (Marks: 1) - Please choose one

_____ Ideally the width of confidence interval should be:

- ▶ 0
- ▶ 1
- ▶ 99
- ▶ 100

Question No: 8 (Marks: 1) - Please choose one

_____ If the sampling distribution of \bar{X} is normal, the interval $\mu_{\bar{x}} \pm 3\sigma_{\bar{x}}$ includes:

- ▶ 99% of the sample means
- ▶ 99.73% of the sample means
- ▶ 98% of the sample means
- ▶ 95% of the sample means

Question No: 9 (Marks: 1) - Please choose one

_____ The probability distribution of a statistic is called the:

- ▶ Population distribution
- ▶ Frequency distribution
- ▶ Sampling distribution
- ▶ Sample distribution

Question No: 10 (Marks: 1) - Please choose one

_____ An estimator T is said to be unbiased estimator of θ if

- ▶ $E(T) = \theta$
- ▶ $E(T) = T$
- ▶ $E(T) = 0$
- ▶ $E(T) = 1$

Question No: 11 (Marks: 1) - Please choose one

_____ If the following is a probability distribution, then what is the value of 'a':

X	1	2	3
P(X)	0.1	a	0.1

- ▶ 0.6
- ▶ 0.8
- ▶ 0.2
- ▶ 0.4

Question No: 12 (Marks: 1) - Please choose one

_____ A discrete probability function $f(x)$ is always:

- ▶ Non-negative
- ▶ Negative
- ▶ One
- ▶ Zero

Question No: 13 (Marks: 1) - Please choose one

_____ An expected value of a random variable is equal to:

- ▶ Variance
- ▶ Mean
- ▶ Standard deviation
- ▶ Covariance

Question No: 14 (Marks: 1) - Please choose one

_____ The

$f(x|1) =$ _____:

- ▶ $f(1,1)$
- ▶ $f(x,1)$
- ▶ $\frac{f(x,1)}{h(1)}$
- ▶ _____

$$\frac{f(x,1)}{h(x)}$$

Question No: 15 (Marks: 1) - Please choose one

_____ The area under a normal curve between 0 and -1.75 is

- ▶ .0401
- ▶ .5500
- ▶ .4599
- ▶ .9599

Question No: 16 (Marks: 1) - Please choose one

_____ The continuity correction factor is used when:

- ▶ The sample size is at least 5
- ▶ Both nP and $n(1-P)$ are at least 30
- ▶ A continuous distribution is used to approximate a discrete distribution
- ▶ The standard normal distribution is applied

Question No: 17 (Marks: 1) - Please choose one

_____ Which of the following is impossible in sampling:

- ▶ Destructive tests
- ▶ Heterogeneous
- ▶ To make voters list
- ▶ None of these

Question No: 18 (Marks: 1) - Please choose one

_____ Which of the following is a systematic arrangement of data into rows and columns?

- ▶ Classification
- ▶ Tabulation
- ▶ Bar chart
- ▶ Component bar chart

Question No: 19 (Marks: 1) - Please choose one

_____ Which one of the following statements is true regarding a sample?

- ▶ It is a part of population

STA301 Solved MCQs

- ▶ It must contain at least five observations
- ▶ It refers to descriptive statistics
- ▶ It produces True value

Question No: 20 (Marks: 1) - Please choose one

_____ The data for an ogive is found in which distribution?

- ▶ A relative frequency distribution
- ▶ A frequency distribution
- ▶ A joint frequency distribution
- ▶ **A cumulative frequency distribution**

1- Hypothesis refers to

The outcome of an experiment

A conclusion drawn from an experiment

A form of bias in which the subject tries to outguess the experimenter

A tentative statement about the relationship

2- Statistics is used by researchers to

Analyze the empirical data collected in a study

Make their findings sound better

Operationally define their variables

Ensure the study comes out the way it was intended

3- A literature review requires

Planning

Good & clear writing

Lot of rewriting

All of the above

4- A literature review is based on the assumption that

Copy from the work of others

Knowledge accumulates and learns from the work of others

Knowledge disaccumulates

None of the above option

5- A theoretical framework

Elaborates the r/s among the variables

Explains the logic underlying these r/s

Describes the nature and direction of the r/s

All of the above

6- Which of the following statement is not true?

A research proposal is a document that presents a plan for a project

A research proposal shows that the researcher is capable of successfully conducting the proposed research project

A research proposal is an unorganized and unplanned project

A research proposal is just like a research report and written before the research project

7- Preliminary data collection is a part of the

Come & Join Us at www.vustudents.net

Descriptive research

Exploratory research

Applied research

Explanatory research

8- Conducting surveys is the most common method of generating

Primary data

Secondary data

Qualitative data

None of the above

9- After identifying the important variables and establishing the logical reasoning in theoretical framework, the next step in the research process is

To conduct surveys

To generate the hypothesis

To focus group discussions

To use experiments in an investigation

10- The appropriate analytical technique is determined by

The research design

Nature of the data collected

Nature of the hypothesis

Both A & B

Personal interviews conducted in shopping malls are known as:

Mall interviews

Mall intercept interviews

Brief interviews

None of the given options

WATS lines provided by long distance telephone service at fixed rates. In this regard, WATS is the abbreviation of:

West Africa Theological Seminary

Washtenaw Area Transportation Study

Wide Area Telecommunications Service

World Air Transport Statistics

A list of questions which is handed over to the respondent, who reads the questions and records the answers himself is known as the:

Interview schedule

Questionnaire

Interview guide

All of the given options

One of the most critical stages in the survey research process is:

Research design

Questionnaire design

Come & Join Us at www.vustudents.net

Interview design
Survey design

Question that consists of two or more questions joined together is called a:

Double barreled question

General question
Accurate question
Confusing question

The number of questionnaires returned or completed divided by the total number of eligible people who were contacted or asked to participate in the survey is called the:

Response rate

Participation rate
Inflation rate
None of the given options

To obtain the freest opinion of the respondent, when we ask general question before a specific question then this procedure is called as the:

Research technique
Qualitative technique

Funnel technique

Quantitative technique

A small scale trial run of a particular component is known as:

Pilot testing
Pre-testing
Lab experiments

Both A & B

Field testing of the questionnaire shows that:

Respondents are willing to co-operate

Respondents are not willing to co-operate
Respondents do not like any participation
All of the given options

Service evaluation of hotels and restaurants can be done by the:

Self-administered questionnaires

Office assistant
Manager
None of the given options

The _____ analysis is a technique for gathering and analyzing the content of a text:

Content analysis

- Graphical analysis
- Field analysis
- Mathematical analysis

_____ is the strength or power of a message in a direction:

Intensity

- Frequency
- Direction
- Space

_____ data refers to information gathered by someone other than the researcher conducting the present study:

- Primary data
- Secondary data**
- Qualitative data
- Quantitative data

_____ research produces soft data:

- Qualitative research**
- Quantitative research
- Descriptive research
- Applied research

_____ research produces hard data:

- Qualitative research
- Quantitative research**
- Descriptive research
- Applied research

_____ research is based on naturalism:

Field research

- Descriptive research
- Basic research
- Applied research

_____ interview is always with one respondent alone:

Survey interview

- Field interview
- Telephone interview
- Electronic interview

Historiography is the method of doing _____research or of gathering & analyzing historical evidence:

Historical research

- Basic research
- Applied research
- Action research

Historical comparative researches often use _____sources or different data types in combination:

- Primary sources
- Secondary sources**
- Internal sources
- External sources

_____is a comprehensive description and analysis of a single situation in a number of specific situations or cases:

- Case study
- Content analysis
- Field research
- None of the given options

Q1. All the persons involved in the collection of data and supervision of data collection process are called

- i. Fieldworkers
- ii. Researchers
- iii. Research assistants
- iv. None of the given options

Q2. While terminating the interview, the fieldworker should **not** do one of the following:

- i. He should record all the responses made by the interviewee before leaving.
- ii. He should thank the interviewee.
- iii. He should close the interview hastily.
- iv. He should answer all the questions the respondent asks concerning the nature and purpose of the study.

Q3. Which one of these is a type of Interviewee bias?

- i. The respondent does not tell his true income, age, or contact information.
- ii. The fieldworker fails to probe the interviewee properly.
- iii. The fieldworker contacted the wrong person for interview.
- iv. The fieldworker asks the questions in wrong order.

Q4. A magazine conducts a survey and asks its readers to cut the questionnaire from the magazine, fill it and send it via mail. It is a type of

- i. Purposive sampling
- ii. Snowball sampling
- iii. Sequential sampling
- iv. Convenience sampling

Q5. The height distribution of a few students in a school is an example of

- i. Statistic
- ii. Population
- iii. Parameter
- iv. Element

Q6. A researcher wants to conduct a survey of the drug users. Which type of sampling technique will be most appropriate here?

- i. Sequential sampling

- ii. Snowball sampling
- iii. Quota sampling
- iv. Convenience sampling

Q7. When there is a need to apply different data collection methods to different parts of the population, the best sampling method would be

- i. Double sampling
- ii. Cluster sampling
- iii. Stratified random sampling
- iv. Systematic random sampling

Q8. The sampling technique in which every element of the population has an equal, non-zero probability of being selected in a sample, is called

- i. Probability sampling
- ii. Convenience sampling
- iii. Purposive sampling
- iv. Quota sampling

Q9. Target population is also called

- i. Population
- ii. Survey population
- iii. Population element
- iv. Population frame

Q10. Which one of them is the method for probing the respondent?

- i. Repeat the question
- ii. Give an expectant pause
- iii. Repeat the respondent's reply
- iv. All of the given options

1. Which one of the following sets is the measure of central tendency?

Mean, standard deviation, mode

Mean, median, standard deviation

Arithmetic mean, median, mode

Standard deviation, internal validity, mode

In lab experiment the effect of _____ Variables is controlled to evaluate the causal relationship.

Extraneous

Moderate

Intervening

All of the above

Internal validity refers to_____.

Researcher's degree of confidence.

Generalizability

Operationalization

All of the above

Which of the following is the weakest experimental design?

One group pretest-posttest design

Come & Join Us at www.vustudents.net

Quasi- experimental design

Two group posttest only design

Ex post facto design

How many times the students appear in the research class is the example of _____.

Intensity

Space

Frequency

Direction

Disadvantage of content analysis is _____.

Researcher can increase the sample size

Provides access on the subjects to which researcher does have physical access.

Sometime documents provide incomplete account to the researcher

Spontaneous feelings can be recorded when they occurred

7. Which of the following statement is incorrect with respect to "An experimental design is a set of procedures specifying:"

How the test units (subjects) are to be divided into homogenous sub samples.

What independent variables or treatments are to be measured?

What dependent variables are to be measured?

How the extraneous variables are to be controlled?

8. Time consumed in mall intercept interview is _____.

High

Moderate

Low

Nil

9. "Teacher should create a friendly environment in the classroom" this is the type of _____.

Leading question

Loaded question

Double Barreled

Burdensome question

10. Departmental stores selected to test a new merchandising display system is the example of _____.

Quota sampling

Convenience sampling

Judgmental sampling

Purposive sampling

1. Which is not a source of existing statistics?
 - A. Government
 - B. International agencies
 - C. Personal interviews
 - D. Private sources

2. Following are the advantages of secondary data except
 - A. Non-Reactivity
 - B. Selective survival
 - C. Low cost
 - D. Spontaneity

3. Following are the disadvantages of secondary data except
 - A. Longitudinal analysis
 - B. Sampling bias
 - C. Coding difficult
 - D. Incompleteness

4. The coding of the secondary data may be difficult because of
 - A. Differences in content or subject matter
 - B. Lack of standardization
 - C. Differences in length and format
 - D. All of these

5. The researcher must be concerned about the following problems while using secondary data in research.
 - A. Validity
 - B. Reliability
 - C. Both of these
 - D. None of these

Discrete variable is also called.....

- Categorical variable
- Discontinuous variable
- Both A & B**
- None of the above

“Officers in my organization have higher than average level of commitment”
Such a hypothesis is an example of.....

- Descriptive Hypothesis**
- Directional Hypothesis
- Relational Hypothesis
- All of the above

'Science' refers to.....

- A system for producing knowledge
- The knowledge produced by a system

Both A & B

None of the above

Which one of the following is not a characteristic of scientific method?

- Deterministic
- Rationalism
- Empirical

Abstraction

The theoretical framework discusses the interrelationships among the.....

Variables

- Hypothesis
- Concept
- Theory

.....research is based on naturalism.

Field research

- Descriptive research
- Basic research
- Applied research

Personal interviews conducted in shopping malls are known as.....

- Mall interviews
- Mall intercept interviews**
- Brief interviews
- None of the given options

..... is used to obtain the freest opinion of the respondent, by asking general question before a specific question.

- Research technique
- Qualitative technique
- Funnel technique**
- Quantitative technique

In, the interviewer and members jointly control the pace and direction of the interview.

Come & Join Us at www.vustudents.net

Field interview

Telephonic interview

Both A and B

None of the given options

Randomization of test units is a part of

Pretest

Posttest

Matching

Experiment

The independent variable is;

The variable manipulated in order to observe its effects

The variable that is measured

The free spirited variable

A confounding variable

If a researcher was studying the use of various instructional approaches to the "multiple intelligences" of his students, he is likely to be conducting which type of research?

Basic

Applied

Evaluation

Grounded theory

Research may differ along a series of dimensions. Which of the following may be applied to this statement?

The type of data collected.

The data-collection technique.

The level of manipulation used to elicit data collection.

Which of the following is least likely to occur as an ethical problem with e-research?

People are not likely to be able to stop once they have begun participating.

Informed consent cannot be completely monitored.

Debriefing could be avoided.

Privacy could be invaded.

All of the given options

Which of the following is the least obtrusive and most accurate method for recording data in an interview?

Note taking

Videotaping

Come & Join Us at www.vustudents.net

- Audio taping
- Writing notes after the interview**

The most critical areas of an article to read is;

Results section

- Introduction
- Abstract
- Limitations

Quantitative social researchers rarely claim to have established causality because:

- They are more concerned with publishing the results of their reliability tests. They do not believe that this is an appropriate goal to be striving for.
- They keep forgetting which of the variables they have manipulated.
- They tend to use cross-sectional designs, which produce only correlations.

Which of the following is most beneficial to read in an article?

- Methods
- Introduction
- Figures
- References**

If a nominal scale is used, it is permissible to calculate which of the following statistics?

- Mean
- Range
- Percentile
- Mode**

One of the preoccupations of quantitative researchers is with generalization, which is a sign of:

- External validity
- Internal reliability
- External reliability
- Internal validity

Which of the following is the least appropriate research problem?

- Does studying Latin improve the standardized vocabulary test scores of seventh grade students?
- Does a drilling fifth grade student with multiplication facts improve their standardized test scores?
- What is the relationship between students' math attitudes and math achievement?**
- Should students have access to controversial novels in school?

The following journal article would be an example of _____ research; "The benefits of florescent lighting on production in a factory setting."

Applied

Interview

Basic

Stupid

The purpose of a literature review is to:

Help you find out what is already known about this area.

Identify any inconsistencies or gaps in the literature.

Demonstrate an awareness of the theoretical context in which the current study can be located.

Find what is already known, identify gaps demonstrate awareness.

Quantitative research has been criticized because:

The measurement process suggests a spurious and artificial sense of accuracy.

The reliance on instruments and procedures makes it high in ecological validity. It underestimates the similarities between objects in the natural and social worlds. It has no validity.

The _____ is only useful if the concepts, ideas, questions, etc. to be investigated are both testable and falsifiable.

Independent Variable

Dependent Variable

Experimental Method

Scientific Method

A _____ scale only assigns numbers to objects to classify the objects according to the characteristic of interest.

Ratio

Nominal

Interval

Dichotomous

12. Which of the following true about the relationship between theory building and data collection?

When studies come out as expected, inductive support for the theory is gained.

If an experiment fails, discarding the experiment is an example of affirming the consequent.

When a hypothesis is not supported, virtually nothing has been learned about the theory.

A good theory will be inclusive enough to explain every possible research outcome.

Ms. Laiba has decided to use the test at the end of the textbook to measure the achievement levels of the students in her study. Which of the following BEST describes the chapter test?

Definition Construct Variable **Operationalized variable**

Come & Join Us at www.vustudents.net

What is the reason for consulting handbooks, yearbooks, encyclopedias, or reviews in the initial stages of identifying a research topic?

- They are readily available.
- They provide an overview of the issues related to a topic.**
- They are primary sources.
- They avoid reporting statistical data so one can interpret the results more easily.

What type of process research is?

A process to discover the truth

- A process to invent the machines
- A process to make new medicines
- A process to create theories**

Which one of the following is not an assumption of science?

- There are reoccurring patterns in the world.
- Events happen because of preceding causes.
- We can discover solutions to problems of interest.**
- Theoretical explanations must agree with common sense.

A good qualitative problem statement:

Defines the independent and dependent variables

- Conveys a sense of emerging design
- Specifies a research hypothesis to be tested
- Specifies the relationship between variables that the researcher expects to find.**

Why do you need to review the existing literature?

- , To give your dissertation a proper academic appearance, with lots of references
- , Because without it, you could never reach the required word-count
- , **To find out what is already known about your area of interest**
- , To help in your general studying

If a researcher was studying the use of various instructional approaches to the "multiple intelligences" of his students, he is likely to be conducting which type of research?

- Basic
- Applied

Evaluation

Grounded theory

Ms. Roshi has been coordinating the Annual Festival at her school for the last several years. She wants to be sure the students and parents enjoy the festival again this year. On which source is she LEAST likely to rely when making decisions about what to do?

Select correct option:

Tradition

Personal experience

Research

Expert opinion

<http://www.vustudents.net>

A review that only demonstrates familiarity with an area is rarely published but it often is part of an educational program is which type of review?

Integrative reviews

Theoretical reviews

Self-study reviews

Historical reviews

A researcher developed a measure of shyness and is now asking whether this measure does in fact measure a person's true state of shyness. This is a question of:

Reactivity

Construct validity

Reliability

Content validity

When you are confident that the experimental manipulation produced the changes you measured in the dependent variable, your study probably has good _____ validity.

Construct

Internal

External

Causal

If a researcher is studying the effect of using laptops in his classroom to ascertain their

merit and worth, he is likely conducting which type of research?

Select correct option:

- Basic
- Applied
- Evaluation**
- Experimental

When doing research involving deception with human subjects, researchers have an obligation to do which of the following?

- Tell subjects the truth about the study's purpose and methods after the study is completed
- Prevent mental and physical harm to subjects
- Let subjects withdraw from the study at any time if they don't want to keep participating
- All of the given options

A literature review requires;

- planning
- clear writing
- good writing
- All of the given option**

A measure has high internal consistency reliability when:

- Multiple observers make the same ratings using the measure.
- Participants score at the high end of the scale every time they complete the measure.
- Multiple observers obtain the same score every time they use the measure.
- Each of the items correlates with other items on the measure.

Which of the following is not a function of clearly identified research questions?

- They guide your literature search.
- They keep you focused throughout the data collection period.
- They make the scope of your research as wide as possible.**

Come & Join Us at www.vustudents.net

- They are linked together to help you construct a coherent argument.

Procedures determining what two issues are rarely used in quantitative research?

- Objectivity and subjectivity
- Reliability and validity
- Accessibility and replicability
- Quality and quantity

Which of the following true about the relationship between theory building and data collection?

- When studies come out as expected, inductive support for the theory is gained.
- If an experiment fails, discarding the experiment is an example of affirming the consequent.
- When a hypothesis is not supported, virtually nothing has been learned about the theory.
- A good theory will be inclusive enough to explain every possible research outcome.

Temperature is measured from which scale?

Nominal

Ordinal

Interval

All the given options.

Which of the following is a threat to internal validity of an experimental design?

Maturation

Interaction of setting and treatment

Interaction effects of pre-testing

reactive effects of experimental design

Which of the following statements is correct about validity and reliability?

When internal validity is high, external validity is low

When internal validity is high, there is no change in external validity

When internal validity is high, external validity is also high

All of the given option

Which of the following effect in internal validity occurs when test units with extreme scores move closer to the average score during the course of the experiment?

Statistical Regression

Selection bias

Maturation

Instrumentation

Interval scale measures which of the following?

The distance between each participant's individual score

An individual's score from zero upwards

more or less of some underlying assumptions

Absolute Zero

Which of the following best describes an assessment that examines students ability to conduct a chemistry experiment in the lab?

Aptitude

interest inventory

Performance Assessment

Standardized test

Which of the following are legitimate frameworks for setting out a literature review?

(1) Constructing intertextual coherence (2) Deconstruction of textual coherence

(3) Problematizing the situation (4) Resolving the discovered problems?

1 & 2

2 & 3

1 & 3

2 & 4

If researcher was studying the use of various instructional approaches to the "multiple intelligence" of his students, he is likely to be conducting which of the following type of research?

Basic

Evaluation

Applied

Ground theory

Which of the following is most beneficial to read in an article?

Methods

Introduction

Figures

reference

One of the preoccupations of quantitative researchers is with generalization, which is a sign of

External validity

Internal Reliability

External Reliability

Internal validity

Which of the following is likely to reduce the validity of a test?

Unclear test directions

Ambiguous test items

Unclear, ambiguous and untaught items

Untaught items

1. Question # 1 of 10 (Start time: 08:23:14 PM) Total Marks: 1

If $Y=bX$, then variance of Y is

Select correct option:

$b^2 \text{ var}(x)$

$\text{var}(x)$

$b \text{ var}(x)$

$b \text{ square root var}(x)$

2. Question # 2 of 10 (Start time: 08:24:38 PM) Total Marks: 1

If $f(x)$ is a continuous probability function, then $P(X = 2)$ is:

Select correct option:

1

0

1/2

2

3. Question # 3 of 10 (Start time: 08:25:52 PM) Total Marks: 1

In regression line $Y=a+bX$, Y is called:

Select correct option:

Dependent variable

Independent variable

Explanatory variable

Regressor

4. Question # 4 of 10 (Start time: 08:26:51 PM) Total Marks: 1

If A and B are mutually exclusive events with $P(A) = 0.25$ and $P(B) = 0.50$, Then $P(A \text{ or } B) = \dots\dots\dots$

Select correct option:

0.25

0.75

0.50

1

5. Question # 5 of 10 (Start time: 08:28:06 PM) Total Marks: 1

Symbolically, a conditional probability is:

Select correct option:

$P(AB)$

$P(A/B)$

$P(A)$

$P(A \cup B)$

6. Question # 6 of 10 (Start time: 08:28:42 PM) Total Marks: 1

In a 52 well shuffled pack of 52 playing cards, the probability of drawing any one diamond card is

Select correct option:

1/52

4/52

13/52

52/52

7. Question # 7 of 10 (Start time: 08:30:13 PM) Total Marks: 1

Probability of a sure event is

Select correct option:

8

1

0

0.5

8. Question # 8 of 10 (Start time: 08:31:42 PM) Total Marks: 1

If $Y=3X+5$, then S.D of Y is equal to

Select correct option:

9 s.d(x)

3 s.d(x)

s.d(x)+5

3s.d(x)+5

9. Question # 9 of 10 (Start time: 08:33:16 PM) Total Marks: 1

The probability of drawing a red queen card from well-shuffled pack of 52 playing cards is

Select correct option:

4/52

2/52

13/52

26/52

10. Question # 10 of 10 (Start time: 08:34:40 PM) Total Marks: 1

If $P(B|A) = 0.25$ and $P(A \text{ and } B) = 0.20$, then $P(A)$ is

Select correct option:

0.05

0.80

0.95

0.75

11. Question # 1 of 10 (Start time: 08:57:45 PM) Total Marks: 1

When a coin is tossed 3 times, the probability of getting 3 tails is

Select correct option:

1/8

3/8

3/6

2/8

12. Question # 2 of 10 (Start time: 08:59:14 PM) Total Marks: 1

In how many ways can a team of 11 players be chosen from a total of 16 players?

Select correct option:

4368(not confirmed)

2426

5400

2680

13. Question # 3 of 10 (Start time: 09:00:38 PM) Total Marks: 1

The standard deviation of c (constant) is

Select correct option:

c

c square

0

does not exist

14. Question # 4 of 10 (Start time: 09:01:46 PM) Total Marks: 1

If $P(E)$ is the probability that an event will occur, which of the following must be false:

Select correct option:

$P(E) = -1$

$P(E) = 1$

$P(E) = 1/2$

$P(E) = 1/3$

15. Question # 5 of 10 (Start time: 09:02:48 PM) Total Marks: 1

Let E and F be events associated with the same experiment. Suppose the E and F are independent and that $P(E) = 1/4$ and $P(F) = 1/2$ Then $P(E \cup F)$ is:

Select correct option:

$1/8$

$3/4$

$7/8$

$5/8$

16. Question # 6 of 10 (Start time: 09:04:09 PM) Total Marks: 1

A student solved 25 questions from first 50 questions of a book to be solved. The probability that he will solve the remaining all questions is:

Select correct option:

0.25

0.5

1

0

17. Question # 7 of 10 (Start time: 09:05:31 PM) Total Marks: 1

If $Y = bX$, then variance of Y is

Select correct option:

$b^2 \text{ var}(x)$

$\text{var}(x)$

$b \text{ var}(x)$

$b \text{ square root var}(x)$

18. Question # 9 of 10 (Start time: 09:07:48 PM) Total Marks: 1

The classical definition of probability assumes:

Select correct option:

Exhaustive events

Mutually exclusive events

Equally likely events

Independent events

19. Question # 10 of 10 (Start time: 09:08:50 PM) Total Marks: 1

In scatter diagram, the variable plotted along Y-axis is:

Select correct option:

Independent variable

Dependent variable

Continuous variable

Discrete variable

20. Which of the following measures of dispersion are based on deviations from the mean?

Select correct option:

Variance

Standard deviation

Mean deviation

Come & Join Us at www.vustudents.net

All of the these

21. What does it mean when a data set has a standard deviation equal to zero?
Select correct option:

All values of the data appear with the same frequency.

The mean of the data is also zero.

All of the data have the same value.

There are no data to begin with.

22. A set of possible values that a random variable can assume and their associated probabilities of occurrence are referred to as _____.
Select correct option:

Probability distribution

The expected return

The standard deviation

Coefficient of variation

23. Which of the following can never be probability of an event?
Select correct option:

0

1

0.5

-0.5

24. The standard deviation of -1, -1, -1, -1 will be
Select correct option:

1

-1

0

Does not exist

25. Which formula represents the probability of the complement of event A:
Select correct option:

$1 + P(A)$

$1 - P(A)$

$P(A)$

$P(A) - 1$

26. The Special Rule of Addition is used to combine:
Select correct option:

Independent Events

Mutually Exclusive Events

Events that total more than 1.00

Events based on subjective probabilities

27. _____ set which is the sub-set of every set is
Select correct option: **Come & Join Us at www.vustudents.net**

Empty Set

Power Set

Universal Set

Super Set

28. $E(4X + 5) = \underline{\hspace{2cm}}$

Select correct option:

12 E (X)

4 E (X) + 5

16 E (X) + 5

16 E (X)

29. When two dice are rolled the number of possible sample points is :

Select correct option:

6

12

24

36

30. Question # 1 of 10 (Start time: 09:43:04 PM) Total Marks: 1

If two events A and B are not mutually exclusive then

Select correct option:

$P(A \text{ or } B) = P(A) + P(B) - P(A \text{ and } B)$

$P(A \text{ or } B) = P(A) + P(B)$

$P(A \text{ or } B) = P(A) \times P(B)$

$P(A \text{ or } B) = P(A) + P(B)$

31.

Question # 2 of 10 (Start time: 09:43:59 PM) Total Marks: 1

Evaluate (10-4)!

Select correct option:

1000

720

480

32

32. Question # 3 of 10 (Start time: 09:45:01 PM) Total Marks: 1

When E is an impossible event, then P(E) is:

Select correct option:

0

1

2

0.5

33. Question # 4 of 10 (Start time: 09:46:20 PM) Total Marks: 1

When we toss a coin , we get only:

Come & Join Us at www.vustudents.net

Select correct option:

1 outcome

2 outcome

3 outcome

4 outcome

34.

Question # 5 of 10 (Start time: 09:47:15 PM) Total Marks: 1

For exhaustive events, the $P(A \cup B \cup C)$ is equal to:

Select correct option:

$P(A)$

$P(S)$

$P(A) * P(B) * P(C)$

$P(B)$

35. Question # 6 of 10 (Start time: 09:48:21 PM) Total Marks: 1

A student solved 25 questions from first 50 questions of a book to be solved. The probability that he will solve the remaining all questions is:

Select correct option:

0.25

0.5

1

0

36. A set of possible values that a random variable can assume and their associated probabilities of occurrence are referred to as _____.

Select correct option:

Probability distribution

The expected return

The standard deviation

Coefficient of variation

37.

Question # 9 of 10 (Start time: 09:50:35 PM) Total Marks: 1

If we roll a die then probability of getting a '6' will be

Select correct option:

2/6

1/6

4/6

1

38. Question # 10 of 10 (Start time: 09:51:36 PM) Total Marks: 1

If $P(A) = 0.45$, $P(B) = 0.35$, and $P(A \text{ and } B) = 0.25$, then $P(A | B)$ is:

Select correct option:

1.4

1.8

0.714

0.556

39. Question # 8 of 10 (Start time: 09:49:53 PM) Total Marks: 1

Which of the following is not a measure of central tendency?

Select correct option:

Percentile

Quartile

<http://www.vustudents.net>

Standard deviation

Mode

40. Question # 1 of 10 (Start time: 09:56:49 PM) Total Marks: 1

Random experiment can be repeated any no. of times under the..... conditions.

Select correct option:

Different

Similar

41. Question # 2 of 10 (Start time: 09:58:09 PM) Total Marks: 1

What is the probability of sure event?

Select correct option:

0

1

0.5

2

42. Question # 3 of 10 (Start time: 09:58:41 PM) Total Marks: 1

The simultaneous occurrence of two events is called:

Select correct option:

Joint probability

Subjective probability

Prior probability

Conditional probability

43. Question # 4 of 10 (Start time: 09:59:47 PM) Total Marks: 1

In regression analysis, the variable that is being predicted is the

Select correct option:

Dependent variable

Independent variable

Intervening variable

None of these

1. Question # 1 of 10 (Start time: 08:23:14 PM) Total Marks: 1

If $Y=bX$, then variance of Y is

Select correct option:

$b^2 \text{ var}(x)$

$\text{var}(x)$

$b \text{ var}(x)$

$b \text{ square root var}(x)$

2. Question # 2 of 10 (Start time: 08:24:38 PM) Total Marks: 1

If $f(x)$ is a continuous probability function, then $P(X = 2)$ is:

Select correct option:

1

0

1/2

2

3. Question # 3 of 10 (Start time: 08:25:52 PM) Total Marks: 1

In regression line $Y=a+bX$, Y is called:

Select correct option:

Dependent variable

Independent variable

Explanatory variable

Regressor

4. Question # 4 of 10 (Start time: 08:26:51 PM) Total Marks: 1

If A and B are mutually exclusive events with $P(A) = 0.25$ and $P(B) = 0.50$, Then $P(A \text{ or } B) = \dots\dots\dots$

Select correct option:

0.25

0.75

0.50

1

5. Question # 5 of 10 (Start time: 08:28:06 PM) Total Marks: 1

Symbolically, a conditional probability is:

Select correct option:

$P(AB)$

$P(A/B)$

$P(A)$

$P(A \cup B)$

6. Question # 6 of 10 (Start time: 08:28:42 PM) Total Marks: 1

In a 52 well shuffled pack of 52 playing cards, the probability of drawing any one diamond card is

Select correct option:

1/52

4/52

13/52

52/52

7. Question # 7 of 10 (Start time: 08:30:13 PM) Total Marks: 1
Probability of a sure event is
Select correct option:
8
1
0
0.5
8. Question # 8 of 10 (Start time: 08:31:42 PM) Total Marks: 1
If $Y=3X+5$, then S.D of Y is equal to
Select correct option:
9 s.d(x)
3 s.d(x)
s.d(x)+5
3s.d(x)+5
9. Question # 9 of 10 (Start time: 08:33:16 PM) Total Marks: 1
The probability of drawing a red queen card from well-shuffled pack of 52 playing cards is
Select correct option:
4/52
2/52
13/52
26/52
10. Question # 10 of 10 (Start time: 08:34:40 PM) Total Marks: 1
If $P(B|A) = 0.25$ and $P(A \text{ and } B) = 0.20$, then $P(A)$ is
Select correct option:
0.05
0.80
0.95
0.75
11. Question # 1 of 10 (Start time: 08:57:45 PM) Total Marks: 1
When a coin is tossed 3 times, the probability of getting 3 tails is
Select correct option:
1/8
3/8
3/6
2/8
12. Question # 2 of 10 (Start time: 08:59:14 PM) Total Marks: 1
In how many ways can a team of 11 players be chosen from a total of 16 players?

Select correct option:

4368(not confirmed)

2426

5400

2680

13. Question # 3 of 10 (Start time: 09:00:38 PM) Total Marks: 1

The standard deviation of c (constant) is

Select correct option:

c

c square

0

does not exist

14. Question # 4 of 10 (Start time: 09:01:46 PM) Total Marks: 1

If $P(E)$ is the probability that an event will occur, which of the following must be false:

Select correct option:

$P(E) = -1$

$P(E) = 1$

$P(E) = 1/2$

$P(E) = 1/3$

15. Question # 5 of 10 (Start time: 09:02:48 PM) Total Marks: 1

Let E and F be events associated with the same experiment. Suppose the E and F are independent and that $P(E) = 1/4$ and $P(F) = 1/2$ Then $P(E \cup F)$ is:

Select correct option:

$1/8$

$3/4$

$7/8$

$5/8$

16. Question # 6 of 10 (Start time: 09:04:09 PM) Total Marks: 1

A student solved 25 questions from first 50 questions of a book to be solved. The probability that he will solve the remaining all questions is:

Select correct option:

0.25

0.5

1

0

17. Question # 7 of 10 (Start time: 09:05:31 PM) Total Marks: 1

If $Y = bX$, then variance of Y is

Select correct option:

$b^2 \text{var}(x)$

$\text{var}(x)$

Come & Join Us at www.vustudents.net

b $\text{var}(x)$
b square root $\text{var}(x)$

18. Question # 9 of 10 (Start time: 09:07:48 PM) Total Marks: 1

The classical definition of probability assumes:

Select correct option:

Exhaustive events

Mutually exclusive events

Equally likely events

Independent events

19. Question # 10 of 10 (Start time: 09:08:50 PM) Total Marks: 1

In scatter diagram, the variable plotted along Y-axis is:

Select correct option:

Independent variable

Dependent variable

Continuous variable

Discrete variable

20. Which of the following measures of dispersion are based on deviations from the mean?

Select correct option:

Variance

Standard deviation

Mean deviation

All of the these

21. What does it mean when a data set has a standard deviation equal to zero?

Select correct option:

All values of the data appear with the same frequency.

The mean of the data is also zero.

All of the data have the same value.

There are no data to begin with.

22. A set of possible values that a random variable can assume and their associated probabilities of occurrence are referred to as _____.

Select correct option:

Probability distribution

The expected return

The standard deviation

Coefficient of variation

23. Which of the following can never be probability of an event?
Select correct option:

- 0
- 1
- 0.5
- 0.5**

24. The standard deviation of -1, -1, -1, -1 will be
Select correct option:

- 1
- 1
- 0**
- Does not exist

25. Which formula represents the probability of the complement of event A:
Select correct option:

- 1 + P (A)
- 1 - P (A)**
- P (A)
- P (A) - 1

26. The Special Rule of Addition is used to combine:
Select correct option:

- Independent Events
- Mutually Exclusive Events**
- Events that total more than 1.00
- Events based on subjective probabilities

27. _____ set which is the sub-set of every set is
Select correct option:

- Empty Set**
- Power Set
- Universal Set
- Super Set

28. $E(4X + 5) =$ _____
Select correct option:

- 12 E (X)
- 4 E (X) + 5**
- 16 E (X) + 5
- 16 E (X)

29. When two dice are rolled the number of possible sample points is :
Select correct option:

- 6
- 12
- 24
- 36**

30. Question # 1 of 10 (Start time: 09:43:04 PM) Total Marks: 1
If two events A and B are not mutually exclusive then
Select correct option:

$P(A \text{ or } B) = P(A) + P(B) - P(A \text{ and } B)$

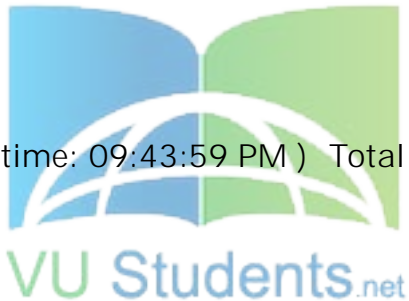

$P(A \text{ or } B) = P(A) + P(B)$

$P(A \text{ or } B) = P(A) \times P(B)$

$P(A \text{ or } B) = P(A) + P(B)$

31. Question # 2 of 10 (Start time: 09:43:59 PM) Total Marks: 1
Evaluate (10-4)!
Select correct option:

- 1000
- 720**
- 480
- 32

32. Question # 3 of 10 (Start time: 09:45:01 PM) Total Marks: 1
When E is an impossible event, then P(E) is:
Select correct option:

- 0**
- 1
- 2
- 0.5

33. Question # 4 of 10 (Start time: 09:46:20 PM) Total Marks: 1
When we toss a coin , we get only:
Select correct option:

- 1 outcome**
- 2 outcome
- 3 outcome
- 4 outcome

34. Question # 5 of 10 (Start time: 09:47:15 PM) Total Marks: 1

For exhaustive events, the $P(A \cup B \cup C)$ is equal to:
Select correct option:

$P(A)$

$P(S)$

$P(A) * P(B) * P(C)$

$P(B)$

35. Question # 6 of 10 (Start time: 09:48:21 PM) Total Marks: 1
A student solved 25 questions from first 50 questions of a book to be solved. The probability that he will solve the remaining all questions is:
Select correct option:

0.25

0.5

1

0

36. A set of possible values that a random variable can assume and their associated probabilities of occurrence are referred to as _____.
Select correct option:

Probability distribution

The expected return

The standard deviation

Coefficient of variation

37. Question # 9 of 10 (Start time: 09:50:35 PM) Total Marks: 1
If we roll a die then probability of getting a '6' will be
Select correct option:

2/6

1/6

4/6

1

38. Question # 10 of 10 (Start time: 09:51:36 PM) Total Marks: 1
If $P(A) = 0.45$, $P(B) = 0.35$, and $P(A \text{ and } B) = 0.25$, then $P(A | B)$ is:
Select correct option:

1.4

1.8

0.714

0.556

39. Question # 8 of 10 (Start time: 09:49:53 PM) Total Marks: 1
Which of the following is not a measure of central tendency?
Select correct option:

Percentile

Quartile

Standard deviation

Mode

40. Question # 1 of 10 (Start time: 09:56:49 PM) Total Marks: 1
Random experiment can be repeated any no. of times under the..... conditions.
Select correct option:

Different

Similar

41. Question # 2 of 10 (Start time: 09:58:09 PM) Total Marks: 1
What is the probability of sure event?
Select correct option:

0

1

0.5

2

42. Question # 3 of 10 (Start time: 09:58:41 PM) Total Marks: 1
The simultaneous occurrence of two events is called:
Select correct option:

Joint probability

Subjective probability

Prior probability

Conditional probability

43. Question # 4 of 10 (Start time: 09:59:47 PM) Total Marks: 1
In regression analysis, the variable that is being predicted is the
Select correct option:

Dependent variable

Independent variable

Intervening variable

None of these

Thanks to Armaan Makhani for His Sharing

1. A quantity obtained by applying certain rule or formula is known as

Select correct option:

Estimate

Estimator

2. Criteria to check a point estimator to be good involves

Select correct option:

Consistency

Unbiasedness

Efficiency

Above all pg 258

3. The F-distribution always ranges from:

Select correct option:

0 to 1

0 to -8

-8 to +8

0 to +8

4. $1-\alpha$ is the probability of

Select correct option:

Type 1 error

Rejection region

Acceptance region

Type 2 error

5. Parameter is aquantity.

Select correct option:

Constant

Variable

6. To find the estimate of a parametermethods are used.

Select correct option:

Two

Three

Four

Many

7. A failing student is passed by an examiner. It is an example of:

Select correct option:

Type I error

Type II error

Correct decision

No information regarding student exams

8. For two mutually exclusive events A and B, $P(A) = 0.2$ and $P(B) = 0.4$, then $P(A \cup B)$ is:

Select correct option:

0.8

0.2

0.6

0.5

9. An urn contains 4 red balls and 6 green balls. A sample of 4 balls is selected from the urn

without replacement. It is the example of:

Select correct option:

Binomial distribution

Hypergeometric distribution

Poisson distribution

Exponential distribution

<http://www.vustudents.net>

10. A standard deck of 52 cards is shuffled. What is the probability of choosing the 5 of diamonds:

Select correct option:

1/5

1/13

5/52

1/52

11. If $P(A \cap B) = 0.12$, $P(A) = 0.3$, find $P(B)$ where 'A' and 'B' are independent:

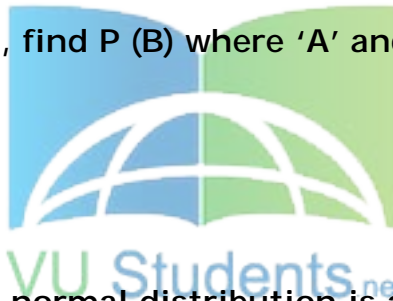

Select correct option:

0.1

0.2

0.3

0.4

12. The mean deviation of the normal distribution is approximately:

Select correct option:

7/8 of the S.D

4/5 of the S.D

3/4 of the S.D

1/2 of the S.D

13. We use the Poisson approximation to the binomial when:

Select correct option:

p is 0.01 or less & n is 10 or more

p is 0.05 or less & n is 20 or more pg221

p is 0.04 or less & n is 15 or more

p is 0.02 or less & n is 10 or more

14. The conditional probability $P(A|B)$ is:

Select correct option:

$P(A \cap B)/P(B)$ pg157

$P(A \cap B)/P(A)$

$P(A \cup B)/P(B)$

$P(A \cup B)/P(A)$

15. We use the General Rule of Multiplication to combine:

Select correct option:

Events those are not independent

Mutually exclusive events

Events that total more than 1.00

Events based on subjective probabilities

16. Which statement is NOT CORRECT?

Come & Join Us at www.vustudents.net

Select correct option:

The sample standard deviation measures variability of our sample values

A larger sample will give answers that vary less from the true value than smaller samples

The sampling distribution describes how our estimate (answer) will vary if a new sample is taken

A large sample size always gives unbiased estimators regardless of how the sample is chosen

17. Probability of an impossible event is always:

Select correct option:

Less than one

Greater than one

Between one and zero

Zero

18. The number of parameters in uniform distribution is (are):

Select correct option:

1

2 pg 224

3

4

19. The probability can never be:

Select correct option:

1

1/2

1

-1/2

20. The conditional probability $P(A \setminus B)$ is:

Select correct option:

$P(A \cap B)/P(B)$

$P(A \cap B)/P(A)$

$P(A \cup B)/P(B)$

$P(A \cup B)/P(A)$

21. A random sample of $n=25$ values gives sample mean 83. Can this sample be regarded as drawn

from a normal population with $\mu = 80$ and $s = 7$? In this question the alternative hypothesis will

be:

Select correct option:

$H_1: \mu = 80$

$H_1: \mu \neq 80$

$H_1: \mu > 80$

$H_1: \mu < 80$ pg 278

22. If $f(x)$ is a continuous probability function, then $P(X = 2)$ is:

Select correct option:

1

0

1/2

2

23. The binomial distribution is negatively skewed when:

Select correct option:

$p > q$ pg 214

$p < q$
 $p = q$
 $p = q = 1/2$

24. If we roll three fair dices then the total number of outcomes is:

Select correct option:

6
36
216
1296

25. When we draw the sample with replacement, the probability distribution to be used is:

Select correct option:

Binomial
Hypergeometric

Binomial & hypergeometric pg 219

Poisson

26. The moment ratios of normal distribution come out to be:

Select correct option:

0 and 1
0 and 2

0 and 3 pg 226

0 and 4

27. The probability of an event is always:

Select correct option:

greater than 0
less than 1

between 0 and 1

greater than 1

28. Symbolically, a conditional probability is:

Select correct option:

$P(AB)$

$P(A/B)$

$P(A)$

$P(A \cup B)$

29. Suppose the test scores of 600 students are normally distributed with a mean of 76 and

standard deviation of 8. The number of students scoring between 70 and 82 is:

Select correct option:

272
164
260
328

30. If $P(A) = 0.3$ and $P(B) = 0.5$, find $P(A/B)$ where 'A' and 'B' are independent:

Select correct option:

0.3
0.5
0.8
0.15

31. An urn contains 4 red balls and 6 green balls. A sample of 4 balls is selected from the urn

without replacement. It is the example of:

Select correct option:

Binomial distribution

Hypergometric distribution

Poisson distribution

Exponential distribution

32. If the second moment ratio is less than 3 the distribution will be:

Select correct option:

Mesokurtic

Leptokurtic

Platykurtic pg 226

None of these

33. For the independent events A and B if $P(A) = 0.25$, $P(B) = 0.40$ then $P(A \text{ and } B) = \dots$

Select correct option:

0.65

0.1

0.50

0.15

34. A set of possible values that a random variable can assume and their associated probabilities of

occurrence are referred to as _____.

Select correct option:

Probability distribution

The expected return

The standard deviation

Coefficient of variation

35. A random variable X has a probability distribution as follows: $X \mid 0 \ 1 \ 2 \ 3 \ P(X) \mid 2k \ 3k \ 13k \ 2k$

What is the possible value of k:

Select correct option:

0.01

0.03

0.05

0.07

36. The probability of drawing any one spade card is:

Select correct option:

1/52

4/52

13/52

52/52

37. The function abbreviated to d.f. is also called the.....

Select correct option:

Probability density function

Probability distribution function pg 172

Commutative distribution function

Discrete function

Come & Join Us at www.vustudents.net

38. Binomial distribution is skewed to the right if:

Select correct option:

$p=q$

$P < q$

$p > q$

$p=n$

39. A discrete probability function $f(x)$ is always:

Select correct option:

Zero

One pg 172

Negative

Non-negative

40. For a binomial distribution, $n= 10$ & $q= 0.6$, the mean of the distribution is:

Select correct option:

0.6

6.0

10

4

41. In the FA examination, 24 candidates offered Statistics. If the probability of passing the subject be $1/3$, what will be the mean of the distribution?

Select correct option:

7

8

6

5

42. The probability that a certain machine will produce a defective item is $1/4$. If a random sample

of 6 items is taken from the output of this machine, what is the probability that there will be 5

or more defectives in the sample?

Select correct option:

$3/4096$

$18/4096$

$19/4096$

$4/4096$

43. Probability of type II error is

Select correct option:

a

B pg 276

$1-a$

$1-B$

44. If the values of variables are increasing or decreasing in the same direction then such kind of

correlation is referred as

Select correct option:

Zero Correlation

Perfect Correlation

Positive Correlation

Negative Correlation

45. **The moving averages of the Prices 55,60,65,70 are**

Select correct option:

70, 75

60, 65

65,65

70,60

46. **The best measure of variation is**

Select correct option:

Range

Quartile deviation

Variance

Coefficient of variance

47. **Ms. Christian calculated a correlation coefficient of .75. Which of the following reflects the best interpretation of this?**

Select correct option:

Weak negative.

Strong negative.

Weak positive.

Strong positive.

48.use the division of a circle into different sectors. Select correct option:

Line graph

Sector graphs

Frequency Polygon

Conversion Graphs

49. **The measurement of measure of degree of to which any two variables vary together is called**

Select correct option:

Regression Coefficient

Correlation

Both (a) and (b)

None of these

50. **Analysis of Variance (ANOVA) is a test for equality of:**

Select correct option:

variances

means

proportions

only two parameters

51. **For some data you are given Maximum value = 96 , Minimum Value = 23 , Range = 73,**

number of classes selected between 5 and 15 Then class width will be Select correct option:

15

8

5

All options 1,2 ,3 are possible

52. If strength of the association between X and Y is very weak, then $r = ?$ Select correct option:

$r = - 1$

$r = 0$

$r = 1$

$r = 2$

53. The moving averages of the Prices 90,70,30,110 are Select correct option:

63.33, 70

73.33, 80

45.45, 68

65.50, 75

54. With increase in sample size, distribution tends to be a.....

Select correct option:

Meso kurtic

Normal

Bell shaped

Above all

55. In the central tendency Mean, Median and Mode

Select correct option:

Mean is better than Median

Median is better than Mode

Mean is better than Mode

All of these are true

56. The degree to which numerical data tend to spread about an average is called

Select correct option:

The dispersion

Standard deviation

Correlation

None of these

57.graphs are similar to bar graphs.

Select correct option:

column

line

conversion

sector

58. A pattern of variation of a time series that repeats every year is called:

Select correct option:

Cyclical

Seasonal

Trend

Secular

59. In the central tendency Mean, Median and Mode

Select correct option:

Mean is better than Median

Median is better than Mode

Mean is better than Mode

All of these are true

60. The degree to which numerical data tend to spread about an average is called

Select correct option:

The dispersion

Come & Join Us at www.vustudents.net

Standard deviation
Correlation
None of these

61.graphs are similar to bar graphs.

Select correct option:

column

line

conversion

sector

62. A pattern of variation of a time series that repeats every year is called:

Select correct option:

Cyclical

Seasonal

Trend

Secular

63. You have measured the systolic blood pressure of a random sample of 22 employees of a

company. A 95% confidence interval for the mean systolic blood pressure for the employees is

computed to be (120,138). Which of the following statements gives a valid interpretation of this interval?

Select correct option:

About 95% of the sample of employees has a systolic

About 95% of the employees in the company have a

If the sampling procedure were repeated many times

If the sampling procedure were repeated many times

64. Assume that a population consists of 7 similar containers having the following weights (kg):

9.8, 10.2, 10.4, 9.8, 10.0, 10.2, 9.6 What is the second moment about mean?

Select correct option:

0.262 kg

0.069kg

0.521 kg

0.313kg

65. How many numbers of parameter(s) are in t-distribution?

Select correct option:

0

1 pg 292

2

3

66. With increase in sample size, distribution tends to be a.....

Select correct option:

Meso kurtic

Normal

Bell shaped

Above all

67. F-distribution is a..... distribution.

Select correct option:

Unimodal pg 312

Bimodal
Discrete
Negatively skewed

68. Which one of the following sampling methods would give unbiased results, if you need to find

out the number of people in your town liking vanilla or chocolate ice creams?

Select correct option:

Ask my neighbors

Randomly select a few ice cream shops in town, and

Ask my friends

Ask my classmates

69. A standard deviation obtained from sampling distribution of sample statistics is known as

Select correct option:

Sampling Error

Standard error pg 240

70. If the regression line: $Y = 3 + 5X$ meets y-axis at '8' units distance from origin then the value of

x-intercept is

Select correct option:

$-(3/5)$

$3/5$

$11/5$

1

71. Sum of three terms whose mean is equal to 90 is

Select correct option:

270

30

Also 90

None of these

72. FREQUENCY Function calculates how often values occur within a range of values.

Select correct option:

true

False

73. Which of the following correlation coefficients represents the weakest correlation between two variables?

Select correct option:

0.15

-0.15

0.02

-1.00

74. If the value of r is 0.8 ,then the coefficient of determination is

Select correct option:

67%

64%

80%

75%

VU Students.net

75. If the dependent variable increases with the independent variable then the coefficient of correlation is

Select correct option:

- 0 to -1
- 0 to - 0.5
- 0 to -2

0 to 1

76. F- distribution tends to normality, if

Select correct option:

- V1~8
- V2~8

V1 and V2 ~8

Sample size is large

77. Consistency of an estimator can be checked by comparing

Select correct option:

- Mean
- MSE

Variance

Standard deviation

78. A standardized estimate has mean and variance

Select correct option:

- (1, 0)**
- (0, 1)
- (μ, s^2)
- (μ, s)

79. A composite hypothesis comprises of

Select correct option:

- Equality
- Not equal to
- Less than/greater

(b) and (c)

80. For a particular hypothesis test, $\alpha=0.05$ and $\beta=0.05$. The power of test is equal to:

Select correct option:

- 0.14
- 0.90

0.95

0.25

81. In a t-distribution

Select correct option:

Mean=median=mode

Mean>Median<Mode

Median >Mean>Mode

Media<Mode<Mean

82. If we reject the null hypothesis, we might be making

Select correct option:

- Type I error
- Type II error
- A correct decision

Unpredictable

83. The Central Limit Theorem is important in Statistics because it allows us to use the normal distribution to make inferences concerning the population mean:

Select correct option:

Provided that the population is normally distributed a

Provided that the population is normally distributed (

Provided that the sample size is reasonably large (fo

Provided that the population is normally distributed and the population variance is known (for any sample size)

84. Herbicide A has been used for years in order to kill a particular type of weed, but an

experiment is to

be conducted in order to see whether a new herbicide, Herbicide B, is more effective than Herbicide A.

Herbicide A will continue to be used unless there is sufficient evidence that Herbicide B is more effective.

The alternative hypothesis in this problem is that

Select correct option:

Herbicide A is more effective than Herbicide B

Herbicide B is more effective than Herbicide A

Herbicide A is not more effective than Herbicide B

Herbicide B is not more effective than Herbicide A

85. A data in which we study about Regions is called

Select correct option:

Qualitative

Quantitative

Geographical

Chronological

86. If the median of an arrangement of numbers is equal to the mean of its middle terms then the arrangement contains

Select correct option:

Odd number of terms

Even number of terms

Unlimited number of terms

Prime number

87. If the graph is very much scattered, then what can be the suitable value of r?

Select correct option:

$r = -0.9$

$r = -0.5$

$r = 0.1$

$r=0.8$

88. In scatter diagram, clustering of points around a straight line indicates

Select correct option:

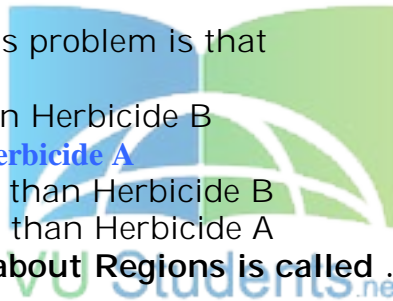

Linear regression

Non-linear regression

Curvilinear linear regression

Both a and b

Come & Join Us at www.vustudents.net

<http://www.vustudents.net>

89. If the standard deviation of a population is 9, the population variance is
Select correct option:

- 3
- 9
- 21.35

81
90. How many steps are involved in general procedure for testing hypothesis:

- 4
- 5
- 6
- 7

91. When testing for independence in a contingency table with 2 rows and 5 columns, there are _____ degrees of freedom.

- 4
- 10
- 7
- 5

92. The critical region is in:

The middle of a distribution

The tails of a distribution

Either the middle or the tails of a distribution

Neither the middle nor the tails of a distribution

93. t-distribution is used to test the hypothesis about.....

Mean

proportion

The term 1-B is called

Level of the test

power of the test

Size of the test

Critical region

94. The asymptotic distribution of t-statistic with n-degree of freedom is

F

Normal

Z T

95. The Gallup Poll has decided to increase the size of its random sample of Canadian voters from

about 1200 people to about 4000 people. The effect of this increase is to:

Reduce the bias of the estimate

Increase the standard error of the estimate

Reduce the variability of the estimate

Increase the confidence interval width for the parameter

96. The value of chi square can never be :

Zero

Less than 1

Greater than 1

Negative

97. The curve of the F- distribution depends upon:

Mean

Variance

Standard Deviation

Sample Size

98. We want to test $H_0 : \mu = 1.5$ vs. $H_1 : \mu \neq 1.5$ at $\alpha = .05$. A 95% confidence interval for μ

calculated from a given random sample is (1.4, 3.6) Based on this finding we:

Fail to reject H_0

Reject H_0

Cannot make any decision at all because the value of the test statistic is not available

Cannot make any decision at all because (1.4, 3.6) is only a 95%

99. When we want to test the equality of two variances we usually use

F-test

Chi-square test

ANOVA

Z_test

100. To find the estimate of a parametermethods are used.

Two

Three

Four

Many

101. In testing hypothesis, we always begin it with assuming that:

Null hypothesis is true

Alternative hypothesis is true

Sample size is large

Population is normal

102. t-distribution is applicable in case of

Independent samples

Dependent samples

Both (a) and (b)

Normal populations

103. When testing for independence in a contingency table with 3 rows and 4 columns, there are

_____ degrees of freedom.

5

6

7

12

104. The Chi- Square distribution is continuous distribution ranging from:

$0 = \infty = 8$

$-\infty = \infty = 0$

$-\infty = \infty = 1$

$-\infty = \infty = 8$

105. The location of the critical region depends upon:

Null hypothesis

Alternative hypothesis

Value of alpha

Value of test-statistic

106. A random sample of $n = 6$ has the elements 6, 10, 13, 14, 18 and 20. What is the point

estimate of the population mean?

12

13.5

11

11.5

107. ML estimators may not

Consistent

Efficient

Unbiased

Bised

108. Which of the following reveals the weakest fact.

Select correct option:

The measure of central tendency measures that value which depends only on the extreme values

The measure of central tendency measures that value in the data which occurs in the data most frequent times.

The measure of central tendency measures the value which has tendency to lie in the central part of the data.

109. The measure of central tendency measures the distance of values from means

Frequency polygon is

Select correct option:

Bar Charts

A line graph

Pareto Chats

None of these

110. A bar graph usesto show data.

Select correct option:

Points

Bars

Lines

Pictures

111. Geographical data deals with...

Select correct option:

Religion

Height

Income

Regions

112. Which one provides the basis for hypothesis testing?

Null hypothesis

Alternative hypothesis

Critical value

Test-statistics

113. The test statistic to test the $U_1 = U_2$ (U represent the mean of population)for normal population for $n > 30$.

F-test

Z-test

T-test

Chi-Square test

114. In a t-distribution

Mean=median=mode

Mean>Median<Mode

Median >Mean>Mode

Media<Mode<Mean

115. $1-\alpha$ is the probability of

Type 1 error

Rejection region

Acceptance region

Type 2 error

116. Inferential statistics involves

Testing

Confidence interval

Estimation

Above all

117. Probability of type II error is

a

B

1-a

1-B

118. if the equation of regression line is $y = 5$, then what result will you take out from it?

Select correct option:

The line passes through origin.

The line passes through (5, 0)

The line is parallel to y-axis.

The line is parallel to x-axis.

119. If the estimating equation is $Y = a - b X$, Which of the following is true

Select correct option:

a)The y intercept is 'b'

b) Slope of line is negative

c) There is inverse relationship

d) b & c

120. The variance of t-distribution, for $v > 2$, is always:

Select correct option:

Greater than zero

Less than one

Equal to one

Greater than one

121. Alpha is the probability of

Select correct option:

Rejecting H_0

Accepting H_0

Rejecting H_1

Accepting H_1

122. What type of data is collected in population census?

Select correct option:

Two Types

123. The collection of all outcomes for an experiment is called

Select correct option:

Come & Join Us at www.vustudents.net

a sample space

the intersection of events
joint probability
population

124. Which of the graph is used for a time series data:

Select correct option:

Frequency curve
Frequency polygon
Histogram

Histogram

125. A histogram is consists of a set of adjacent rectangles whose bases are marked off by:

Select correct option:

Class boundaries

Class limits
Class frequency
Class marks

126. The value that has half of the observations above it and half the observations below it is

known as:

Select correct option:

Mean

Median

Mode
Standard deviation

127. The height of a student is 60 inches. This is an example of?

Select correct option:

Continuous data

Qualitative data
Categorical data
Discrete data

128. Range of the values -2,-3,-4,-3,-9,-2,-8,-1,0 is

Select correct option:

0

-9

8

9

129. If the both tails of the distribution are equal, then distribution is called:

Select correct option:

J-shaped

Symmetrical

Positively Skewed
Negatively Skewed

130. Ranking scale also include the properties of which scale?

Select correct option:

Nominal scale

Interval scale
Ratio scale
All of these

131. Range of the values -2.50,-3.70,-4.80,-3.10,-9.70,-2.20,-8.90,-1.60, 0.60 is

Select correct option:

10.03

10.30

9.10

9.00

132. What is/are the mode for the following data: 1,m,d,n,,2,d,2,d,s,5,5,7

Select correct option:

2

d

5

2,d,5

133. If the standard deviation of a population is 5.5, the population variance is:

Select correct option:

5.5

31

25

30.25

134. What we commonly called a bell shaped distribution:

Select correct option:

syme

bi moder

u shap

skewed

135. The beginnings of a cumulative frequency distribution are presented below.

What is the

next number in the Cumulative Frequency column? Classes Frequency Cumulative Frequency

6.1 to 8 1 1 8.1 to 10 2 10.1 to 12 3

Select correct option:

0

1

2

3

136. Range of the values -10,- 19, -9, -15, -28, -26, -25 is:

Select correct option:

+18

-18

-19

+19

137. Which one of the following is less than median for a symmetrical distribution:

Select correct option:

50percentile

51 percentile

2quartile

4decile

138. The value of the middle term in a ranked (ordered) data set is called the

Select correct option:

mode

mean

median

harmonic mean

139. Sum of absolute deviations of the values is least when deviations are taken from

Select correct option:

mean

median

mode

g.m

140. Statistic is a numerical quantity, which is calculated from

Select correct option:

data

observation

sample

population

141. The branch of Statistics that is concerned with the procedures and methodology for

obtaining valid conclusions is called:

Select correct option:

descriptive

advance

inferential

sample

142. How to find the class midpoint?

Select correct option:

Half the sum of upper class limit and lower class limit

Find the difference between consecutive lower limits

Count the number of observations in the class

Divide the class frequency by the number of observ

143. For given data, discuss the shape of the distribution: X f 0.2 8 1.2 15 2.2 23 3.2 40

Select correct option:

Positively skewed

Negatively skewed

Symmetric curve

U- Shaped curve

144. Data classified by attributes are called:

Select correct option:

group

qualitative

quantitative

array

if '2' is a leading digit in 24335, than what are the trailing digits in the observation to display a 'Stem-and -Leaf display'.

Select correct option:

4

335

4335

43

145. A frequency polygon is obtained by plotting the class frequencies against what?

Select correct option:
classboundary
cumulative frequency
relative frequency

mid point

146. When more values are lying at the start of the distribution, it is:

Select correct option:
u shape

positive

negative
symmetrica

147. The data for an ogive is found in which distribution:

Select correct option:

A cumulative frequency distribution

A joint frequency distribution
A frequency distribution
A relative frequency distribution

148. Which one of the following is greater than median for a symmetrical distribution:

Select correct option:

1st Decile

7th Decile

44th Percentile
14th Percentile

149. Statistics deals with

Select correct option:

Individuals
Isolated items
Isolated items

Aggregates of facts

150. Data classified by attributes are called:

Select correct option:

Grouped data
Qualitative data
Quantitative data
Arrayed data

151. As a general rule, statisticians tends to use which of the following number of classes when

arranging the data

Select correct option:

Fewer than 5

Between 5 & 20

Between 8 & 15
More than 20

152. The collection of all outcomes for an experiment is called

Select correct option:

a sample space

the intersection of events

joint probability

population

153. If $P(E)$ is the probability that an event will occur, which of the following must be false:

Select correct option:

$P(E) = -1$

$P(E) = 1$

$P(E) = 1/2$

$P(E) = 1/3$

154. If we roll a die then probability of getting a '2' will be

Select correct option:

$2/6$

$1/6$

$4/6$

1

155. In a multiplication theorem $P(A \cap B)$ equals:

Select correct option:

$P(A) P(B)$

$P(A) + P(B)$

$P(A) * P(B|A)$ pg 158

$P(B \setminus A) * P(B)$

156. If $Y = 3X + 5$, then S.D of Y is equal to

Select correct option:

9 s.d(x)

3 s.d(x)

s.d(x) + 5

$3s.d(x) + 5$

157. In regression line $Y = a + bX$, X is called:

Select correct option:

Dependent variable

Independent variable

Explained variable

Regressand

158. Symbolically, a marginal probability is:

Select correct option:

$P(AB)$

$P(A \cup B)$

$P(A/B)$

$P(A)$

159. Which formula represents the probability of the complement of event A:

Select correct option:

$1 + P(A)$

$1 - P(A)$

$P(A)$

$P(A) - 1$

160. If A and B are independent events with $P(A) = 0.05$ and $P(B) = 0.65$, then $P(A|B)$

= :

Select correct option:

0.65

0.05

0.03

0.07 not sure

161. The probability of drawing a 'white' ball from a bag containing 4 red, 8 black and 3 white

balls is:

Select correct option:

0

3/15

1/12

1/2

<http://www.vustudents.net>

162. An expected value of a random variable is equal to:

Select correct option:

Variance

Mean

Standard deviation

Quartile

163. When we toss a fair coin 4 times, the sample space consists of....points.

Select correct option:

4

8

12

16

164. $5C5=$

Select correct option:

5

1

10

25

165. In a probability distribution, the sum of the probabilities is equal to:

Select correct option:

0

0.1

0.5

1

166. The simultaneous occurrence of two events is called:

Select correct option:

Joint probability

Subjective probability

Prior probability

Conditional probability

167. Let E and F be events associated with the same experiment. Suppose the E and F are

independent and that $P(E) = 1/4$ and $P(F) = 1/2$ Then $P(E \cup F)$ is:

Select correct option:

1/8

3/4

7/8

5/8

Question No: 1 (Marks: 1) - Please choose one

_____ When each outcome of a sample space has equal chance to occur as any other, the outcomes are called:

- ▶ Mutually exclusive
- ▶ Equally likely
- ▶ Not mutually exclusive
- ▶ Exhaustive

Question No: 2 (Marks: 1) - Please choose one

F-distribution is:

_____ The mean of the

▶ $\frac{v_1}{v_1 - 2} \text{ for } v_1 > 2$

▶ $\frac{v_2}{v_2 - 2} \text{ for } v_2 > 2$

▶ $\frac{v_1}{v_1 - 2} \text{ for } v_1 \geq 2$

▶ $\frac{v_2}{v_2 - 2} \text{ for } v_1 \leq 2$

Question No: 3 (Marks: 1) - Please choose one

_____ The LSD test is applied only if the null hypothesis is:

- ▶ Rejected
- ▶ Accepted
- ▶ No conclusion
- ▶ Acknowledged

Question No: 4 (Marks: 1) - Please choose one

_____ Analysis of variance is a procedure that enables us to test the equality of several:

<http://vustudents.ning.com>

- ▶ Variances
- ▶ Means
- ▶ Proportions
- ▶ Groups

Question No: 5 (Marks: 1) - Please choose one

_____ ANOVA was introduced by :

- ▶ Helmert
- ▶ Pearson
- ▶ R.A Fisher
- ▶ Francis

Question No: 6 (Marks: 1) - Please choose one

_____ For testing of hypothesis about population proportion , we use:

- ▶ Z-test
- ▶ t-Test
- ▶ Both Z & T-test

Come & Join Us at www.vustudents.net

► F test

Question No: 7 (Marks: 1) - Please choose one

_____ If a random variable X denotes the number of heads when three distinct coins are tossed, the X assumed the values:

- 0,1,2,3
- 1,3,3,1
- 1, 2, 3
- 3, 2

Question No: 8 (Marks: 1) - Please choose one

_____ If X and Y are independent variables, then $E(XY)$ is: <http://vustudents.ning.com>

- $E(XX)$
- $E(X).E(Y)$
- $X.E(Y)$
- $Y.E(X)$

Question No: 9 (Marks: 1) - Please choose one

_____ The parameters of the binomial distribution $b(x; n, p)$ are:

- x & n
- x & p
- n & p
- x, n & p

Question No: 10 (Marks: 1) - Please choose one

_____ If P (E) is the probability that an event will occur, which of the following must be false:

- ▶ $P(E) = -1$
- ▶ $P(E) = 1$
- ▶ $P(E) = 1/2$
- ▶ $P(E) = 1/3$

Question No: 11 (Marks: 1) - Please choose one

_____ An estimator T is said to be unbiased estimator of θ if $E(T) = \theta$ if <http://vustudents.ning.com>

- ▶ $E(T) = \theta$
- ▶ $E(T) = T$
- ▶ $E(T) = 0$
- ▶ $E(T) = 1$

Question No: 12 (Marks: 1) - Please choose one

_____ The best unbiased estimator for population variance σ^2 is:

- ▶ Sample mean
- ▶ Sample median

▶ Sample proportion

▶ Sample variance

Question No: 13 (Marks: 1) - Please choose one

_____ The sample

$$s^2 = \frac{\sum(x - \bar{x})^2}{n}$$

variance is:

▶ Unbiased estimator of σ^2

▶ Biased estimator of σ^2

▶ Unbiased estimator of μ

▶ None of these

Question No: 14 (Marks: 1) <http://vustudents.ning.com> - Please choose one

_____ When c is a constant, then E(c) is:

1

0

c

STA301 Solved MCQz by Muhammad Ishfaq

- ▶ 0
- ▶ 1
- ▶ c
- ▶ -c

Question No: 15 (Marks: 1) - Please choose one

_____ If $f(x, y)$ is bivariate probability density function of continuous r.v.'s X and Y then

$g(x)$ is:

▶ $\int_{-\infty}^{\infty} f(x, y) dx$

▶ $\int_{-\infty}^{\infty} f(x, y) dy$

▶ $\int_{-\infty}^{\infty} \int_{-\infty}^{\infty} f(x, y) dx dy$

▶ $\int_a^b \int_c^d f(x, y) dy dx$

Question No: 16 (Marks: 1) - Please choose one

_____ The analysis of variance technique is a method for : <http://vustudents.ning.com>

- ▶ Comparing F distributions
- ▶ Comparing three or more means
- ▶ Measuring sampling error
- ▶ Comparing variances

Question No: 17 (Marks: 1) - Please choose one

_____ The continuity correction factor is used when:

- ▶ The sample size is at least 5
- ▶ Both nP and $n(1-P)$ are at least 30
- ▶ A continuous distribution is used to approximate a discrete distribution
- ▶ The standard normal distribution is applied

Question No: 18 (Marks: 1) - Please choose one

_____ Stem and leaf is more informative when data is :

- ▶ Equal to 100
- ▶ Greater Than 100
- ▶ Less than 100
- ▶ In all situations

The branch of Statistics that is concerned with the procedures and methodology for obtaining valid conclusions is called:
<http://vustudents.ning.com>

- ▶ Descriptive Statistics
- ▶ Advance Statistics
- ▶ Inferential Statistics

- ▶ Sampled Statistics

Question No: 20 (Marks: 1) - Please choose one

Which of the following is a systematic arrangement of data into rows and columns?

- ▶ Classification
- ▶ Tabulation
- ▶ Bar chart
- ▶ Component bar chart

Question No: 21 (Marks: 1) - Please choose one

In normal distribution Q.D =

- ▶ 0.5σ
- ▶ 0.75σ
- ▶ 0.7979σ

- ▶ 0.6745σ

Question No: 22 (Marks: 1) - Please choose one

_____ In normal distribution $\beta_2 =$

- ▶ 1
- ▶ 2
- ▶ 3
- ▶ 0

Question No: 23 (Marks: 1) - Please choose one

_____ If you connect the mid-points of rectangles in a histogram by a series of lines that also touches the x-axis from both ends, what will you get?

- ▶ Ogive
- ▶ Frequency polygon
- ▶ Frequency curve
- ▶ Histogram

Question No: 24 (Marks: 1) <http://vustudents.ning.com> - Please choose one

_____ Which one of the following statements is true regarding a population?

- ▶ It must be a large number of values
- ▶ It must refer to people
- ▶ It is a collection of individuals, objects, or measurements
- ▶ It is small part of whole

Question No: 25 (Marks: 1) - Please choose one

Come & Join Us at www.vustudents.net

$Q_1 = 2$ and $Q_3 = 4$

,what is the value of Median, if the distribution is symmetrical:

- ▶ 1
- ▶ 2
- ▶ 3
- ▶ 4

<http://www.vustudents.net>

Question No: 26 (Marks: 1) - Please choose one

In a simple linear regression model, if it is assumed that the intercept parameter is equal to zero, then:

- ▶ The regression line will pass through the origin
- ▶ The regression line will pass through the point (0,10).
- ▶ The regression line will pass through the point (0,-10).
- ▶ The slope of the line will also be equal to 0.

Question No: 27 (Marks: 1) - Please choose one

The degrees of freedom for a t-test with sample size 10 is:

- ▶ 5
- ▶ 8
- ▶ 9
- ▶ 10

Question No: 28 (Marks: 1) - Please choose one

In testing of hypothesis, we always begin it with assuming that:

- ▶ Null hypothesis is true

- ▶ Alternative hypothesis is true
- ▶ Sample size is large
- ▶ Population is normal

Question No: 29 (Marks: 1) - Please choose one

_____ A failing student is passed by an examiner is an example of:

- ▶ Type I error
- ▶ Type II error
- ▶ Correct decision
- ▶ No information regarding student exams

Question No: 30 (Marks: 1) - Please choose one

_____ How to find $P(X + Y \leq 1)$?

- ▶ $f(0, 0) + f(0, 1) + f(1, 2)$
- ▶ $f(2, 0) + f(0, 1) + f(1, 0)$
- ▶ $f(0, 0) + f(1, 1) + f(1, 0)$
- ▶ $f(0, 0) + f(0, 1) + f(1, 0)$

Question No: 1 (Marks: 1) - Please choose one

_____ The value of χ^2 can never be :

- ▶ Zero

- ▶ Less than 1
- ▶ Greater than 1
- ▶ Negative

Question No: 2 (Marks: 1) - Please choose one

_____ The mean of the F-distribution is:

▶ $\frac{v_1}{v_1 - 2} \text{ for } v_1 > 2$

▶ $\frac{v_2}{v_2 - 2} \text{ for } v_2 > 2$

▶ $\frac{v_1}{v_1 - 2} \text{ for } v_1 \geq 2$

▶

Question No: 3 (Marks: 1) - Please choose one

_____ The F-distribution always ranges from:

- ▶ 0 to 1

- ▶ 0 to $-\infty$
- ▶ $-\infty$ to $+\infty$
- ▶ 0 to $+\infty$

Question No: 4 (Marks: 1) - Please choose one

_____ The total number of samples when sampling is done with replacement :

- ▶ N^n
- ▶ C_n^N
- ▶ $\frac{N-n}{N-1}$
- ▶ 1

Question No: 5 (Marks: 1) - Please choose one

_____ ANOVA was introduced by :

- ▶ Helmert
- ▶ Pearson
- ▶ R.A Fisher
- ▶ Francis

Question No: 6 (Marks: 1) - Please choose one

_____ The test statistic used in analysis of variance procedure follow the distribution.:

- ▶ χ^2
- ▶ T

- ▶ Z
- ▶ F

Question No: 7 (Marks: 1) - Please choose one

_____ For testing of hypothesis about population proportion , we use:

- ▶ Z-test
- ▶ t-Test
- ▶ Both Z & T-test
- ▶ F test

Question No: 8 (Marks: 1) - Please choose one

_____ If X and Y are random variables, then $E(X - Y)$ is equal to:

- ▶ $E(X) + E(Y)$
- ▶ $E(X) - E(Y)$
- ▶ $X - E(Y)$
- ▶ $E(X) - Y$

Question No: 9 (Marks: 1) - Please choose one

_____ A die is rolled. What is the probability that the number rolled is greater than 2 and even:

- ▶ 1/2

- ▶ 1/3
- ▶ 2/3
- ▶ 5/6

Question No: 10 (Marks: 1) - Please choose one

_____ The probability of drawing a king of spade from a pack of 52 cards is:

- ▶ 1/4
- ▶ 1/13
- ▶ 1/26
- ▶ 1/52

Question No: 11 (Marks: 1) - Please choose one

_____ An estimator T is said to be unbiased estimator of θ if

- ▶ $E(T) = \theta$
- ▶ $E(T) = T$
- ▶ $E(T) = 0$
- ▶ $E(T) = 1$

Question No: 12 (Marks: 1) - Please choose one

_____ From point estimation, we always get

- ▶ Single value
- ▶ Two values
- ▶ Range of values
- ▶ Zero

Question No: 13 (Marks: 1) - Please choose one

_____ The best unbiased estimator for population variance σ^2 is:

- ▶ Sample mean
- ▶ Sample median
- ▶ Sample proportion
- ▶ Sample variance

Question No: 14 (Marks: 1) - Please choose one

_____ When c is a constant, then $E(c)$ is:

0

c

-c

- ▶ 0
- ▶ 1
- ▶ c
- ▶ -c

Question No: 15 (Marks: 1) - Please choose one

_____ $\text{Var}(4X + 5)$
= _____

- ▶ 16 Var (X)
- ▶ 16 Var (X) + 5
- ▶ 4 Var (X) + 5
- ▶ 12 Var (X)

Question No: 16 (Marks: 1) - Please choose one

_____ When $f(x)$ is
continuous probability function, then $P(X = 1)$ is:

- ▶ 1
- ▶ ∞
- ▶ $-\infty$
- ▶ 0

Question No: 17 (Marks: 1) - Please choose one

_____ The hypergeometric random variable is a(an):

- ▶ Continuous variable
- ▶ Discrete variable
- ▶ Undefined
- ▶ Independent variable

Question No: 18 (Marks: 1) - Please choose one

_____ From a sample of 200 people were asked whether they like a particular product. Fifty said 'yes' and remain said 'no', assuming 'yes' means a success, which of the following is correct?

- ▶ Sample proportion $p=0.33$
- ▶ Sample proportion $p=0.25$
- ▶ Population proportion $p= 0.33$

Question No: 19 (Marks: 1) - Please choose one

_____ In any data set,
what percent of values fall in the interval $Median \pm Q.D$?

- ▶ 50 per cent
- ▶ 68.5 per cent
- ▶ 95.4 per cent
- ▶ 99 per cent

Question No: 20 (Marks: 1) - Please choose one

_____ If

$$\sum_{i=1}^5 (X_i - 20) = 0, \text{ then } \bar{X} = \dots\dots$$

- ▶ 0
- ▶ 20
- ▶ 5
- ▶ 25

Question No: 21 (Marks: 1) - Please choose one

_____ The height of a student is 60 inches. This is an example of

- ▶ Continuous data

Come & Join Us at www.vustudents.net

- ▶ Qualitative data
- ▶ Categorical data

<http://www.vustudents.net>

- ▶ Discrete data

Question No: 22 (Marks: 1) - Please choose one

_____ In Statistics, we have MSE which is abbreviation of.....

- ▶ Mean square error
- ▶ Measured square error
- ▶ Medical screening exam
- ▶ Major sampling error

Question No: 23 (Marks: 1) - Please choose one

_____ Which one is the formula of mid range:

- ▶ $x_m - x_0$
- ▶ $x_0 - x_m$
- ▶ $\frac{x_0 - x_m}{2}$
- ▶ $\frac{x_0 + x_m}{2}$

Question No: 24 (Marks: 1) - Please choose one

_____ The deviation of a distribution from symmetry is called:

- ▶ Kurtosis
- ▶ Skewness
- ▶ Dispersion
- ▶ Flatness

Question No: 25 (Marks: 1) - Please choose one

_____ If E is an impossible event, then $P(E)$ is:

- ▶ 1
- ▶ 2
- ▶ 0
- ▶ 0.5

Question No: 26 (Marks: 1) - Please choose one

_____ If a data set has the even number of observations, the median :

- ▶ Is the average value of the two middle items
- ▶ Can not be determined
- ▶ must be equal to the mean

- ▶ Is the average value of the two middle items when all items are arranged in ascending order

Question No: 27 (Marks: 1) - Please choose one

For the Poisson distribution $P(X = 1) = \frac{e^{-0.135} 0.135^1}{1!}$ the mean value is :

- ▶ 2
- ▶ 5
- ▶ 10
- ▶ 0.135

Question No: 28 (Marks: 1) - Please choose one

In testing of hypothesis, we always begin it with assuming that:

- ▶ Null hypothesis is true
- ▶ Alternative hypothesis is true
- ▶ Sample size is large
- ▶ Population is normal

www.vuzs.net

<http://groups.google.com/group/vuzs>

Question No: 29 (Marks: 1) - Please choose one

Variance of the t-distribution is given by the formula:

$$\sigma^2 = \sqrt{\frac{v}{v-2}}$$

- ▶ Come & Join Us at www.vustudents.net

$$\sigma^2 = \frac{v^2}{v-2}$$

$$\sigma^2 = \frac{v}{v-1}$$

$$\sigma^2 = \frac{v}{v-2}$$

Question No: 30 (Marks: 1) - Please choose one

_____ If a continuous probability distribution has $\beta_2 = 2.14$ then what will be peakedness of the distribution?

- ▶ Platykurtic
- ▶ Mesokurtic
- ▶ Leptokurtic
- ▶ Moderately skewed

Question # 1 of 10 (Start time: 07:10:27 PM) Total Marks: 1

When two dice are rolled the number of possible sample points is :
Select correct option:

- 6
- 12
- 24
- 36

Question # 2 of 10 (Start time: 07:11:18 PM) Total Marks: 1

A fair coin is tossed three times, the probability that at least one head appear is:
Select correct option:

- 1/8
- 7/8
- 3/8
- 5/8

Question # 3 of 10 (Start time: 07:12:14 PM) Total Marks: 1

In scatter diagram, the variable plotted along Y-axis is:
Select correct option:

Independent variable

Dependent variable

Continuous variable

Discrete variable

of the following is not a measure of central tendency?
Select correct option:

Percentile

Quartile

Standard deviation

Mode

Which of the following is NOT a possible probability?
Select correct option:

25/100

1.25

0

1

Question # 6 of 10 (Start time: 07:16:06 PM) Total Marks: 1
Evaluate (10-4)!

Select correct option:

1000

720

480

32

Question # 7 of 10 (Start time: 07:17:34 PM) Total Marks: 1
When E is an impossible event, then $P(E)$ is:

Select correct option:

0

1

2

0.5

Question # 8 of 10 (Start time: 07:19:00 PM) Total Marks: 1

The probability of drawing a 'white' ball from a bag containing 4 red, 8 black and 3 white balls is:

Select correct option:

- 0
- 3/15
- 1/12
- 1/2

standard deck of 52 cards is shuffled. What is the probability of choosing the 5 of diamonds:

Select correct option:

- 1/5
- 1/13
- 5/52
- 1/52

If we roll three fair dices then the total number of outcomes is:

Select correct option:

- 6
- 36
- 216
- 1296

Question No: 1 (Marks: 1) - Please choose one

Mean deviation is always:

- ▶ Less than S.D
- ▶ Greater than S.D
- ▶ Greater or equal to S.D
- ▶ Less or equal to S.D

Question No: 2 (Marks: 1) - Please choose one

The value of x^2 can never be :

- ▶ Zero
- ▶ Less than 1
- ▶ Greater than 1
- ▶ Negative

Question No: 3 (Marks: 1) - Please choose one
The mean of the F-distribution is:

- ▶
- ▶
- ▶
- ▶

Question No: 4 (Marks: 1) - Please choose one
If X and Y are random variables, then is equal to:

- ▶
- ▶
- ▶
- ▶

Question No: 5 (Marks: 1) - Please choose one
Evaluate: $(9-4)!$

- ▶ 362880
- ▶ 120
- ▶ 24
- ▶ 6

Question No: 6 (Marks: 1) - Please choose one
Which formula represents the probability of the complement of event A:

- ▶ $1 + P(A)$
- ▶ $1 - P(A)$
- ▶ $P(A)$
- ▶ $P(A) - 1$

Question No: 7 (Marks: 1) - Please choose one
Ideally the width of confidence interval should be:

- ▶ 0
- ▶ 1
- ▶ 99
- ▶ 100

Question No: 8 (Marks: 1) - Please choose one
If the sampling distribution of is normal, the interval includes:

- ▶ 99% of the sample means
- ▶ 99.73% of the sample means
- ▶ 98% of the sample means
- ▶ 95% of the sample means

Question No: 9 (Marks: 1) - Please choose one
The probability distribution of a statistic is called the:

- ▶ Population distribution
- ▶ Frequency distribution
- ▶ Sampling distribution
- ▶ Sample distribution

Question No: 10 (Marks: 1) - Please choose one
An estimator T is said to be unbiased estimator of if

- ▶ $E(T) =$
- ▶ $E(T) = T$
- ▶ $E(T) = 0$
- ▶ $E(T) = 1$

Question No: 11 (Marks: 1) - Please choose one
If the following is a probability distribution, then what is the value of 'a':

X
1 2 3
P(X)
0.1 a 0.1

- ▶ 0.6
- ▶ 0.8
- ▶ 0.2
- ▶ 0.4

Question No: 12 (Marks: 1) - Please choose one
A discrete probability function $f(x)$ is always:

- ▶ Non-negative
- ▶ Negative
- ▶ One
- ▶ Zero

Question No: 13 (Marks: 1) - Please choose one
An expected value of a random variable is equal to:

- ▶ Variance
- ▶ Mean
- ▶ Standard deviation
- ▶ Covariance

Question No: 14 (Marks: 1) - Please choose one
The _____:

- ▶
- ▶
- ▶
- ▶

Question No: 15 (Marks: 1) - Please choose one
The area under a normal curve between 0 and -1.75 is

- ▶ .0401
- ▶ .5500
- ▶ .4599
- ▶ .9599

Question No: 16 (Marks: 1) - Please choose one
The continuity correction factor is used when:

- ▶ The sample size is at least 5
- ▶ Both nP and $n(1-P)$ are at least 30
- ▶ A continuous distribution is used to approximate a discrete distribution
- ▶ The standard normal distribution is applied

Question No: 17 (Marks: 1) - Please choose one
Which of the following is impossible in sampling:

- ▶ Destructive tests
- ▶ Heterogeneous
- ▶ To make voters list
- ▶ None of these

Question No: 18 (Marks: 1) - Please choose one
Which of the following is a systematic arrangement of data into rows and columns?

- ▶ Classification
- ▶ Tabulation
- ▶ Bar chart
- ▶ Component bar chart

Question No: 19 (Marks: 1) - Please choose one

Which one of the following statements is true regarding a sample?

- ▶ It is a part of population
- ▶ It must contain at least five observations
- ▶ It refers to descriptive statistics
- ▶ It produces True value

Question No: 20 (Marks: 1) - Please choose one

The data for an ogive is found in which distribution?

- ▶ A relative frequency distribution
- ▶ A frequency distribution
- ▶ A joint frequency distribution
- ▶ A cumulative frequency distribution

Question No: 1 (Marks: 1) - Please choose one

When each outcome of a sample space has equal chance to occur as any other, the outcomes are called:

- ▶ Mutually exclusive
- ▶ Equally likely
- ▶ Not mutually exclusive
- ▶ Exhaustive

Question No: 2 (Marks: 1) - Please choose one

The mean of the F-distribution is:

- ▶
- ▶
- ▶
- ▶

Question No: 3 (Marks: 1) - Please choose one

The LSD test is applied only if the null hypothesis is:

- ▶ Rejected
- ▶ Accepted
- ▶ No conclusion
- ▶ Acknowledged

Question No: 4 (Marks: 1) - Please choose one

Analysis of variance is a procedure that enables us to test the equality of several:

- ▶ Variances
- ▶ Means
- ▶ Proportions
- ▶ Groups

Question No: 5 (Marks: 1) - Please choose one
ANOVA was introduced by :

- ▶ Helmert
- ▶ Pearson
- ▶ R.A Fisher
- ▶ Francis

<http://www.vustudents.net>

Question No: 6 (Marks: 1) - Please choose one
For testing of hypothesis about population proportion , we use:

- ▶ Z-test
- ▶ t-Test
- ▶ Both Z & T-test
- ▶ F test

Question No: 7 (Marks: 1) - Please choose one
If a random variable X denotes the number of heads when three distinct coins are tossed, the X assumed the values:

- ▶ 0,1,2,3
- ▶ 1,3,3,1
- ▶ 1, 2, 3
- ▶ 3, 2

Question No: 8 (Marks: 1) - Please choose one
If X and Y are independent variables, then $E(XY)$ is:

- ▶ $E(XX)$
- ▶ $E(X).E(Y)$
- ▶ $X.E(Y)$
- ▶ $Y.E(X)$

Question No: 9 (Marks: 1) - Please choose one
The parameters of the binomial distribution $b(x; n, p)$ are:

- ▶ x & n
- ▶ x & p
- ▶ n & p
- ▶ x, n & p

Question No: 10 (Marks: 1) - Please choose one
If $P(E)$ is the probability that an event will occur, which of the following must be false:

- ▶ $P(E) = -1$
- ▶ $P(E) = 1$
- ▶ $P(E) = 1/2$
- ▶ $P(E) = 1/3$

Question No: 11 (Marks: 1) - Please choose one

An estimator T is said to be unbiased estimator of if

- ▶ $E(T) =$
- ▶ $E(T) = T$
- ▶ $E(T) = 0$
- ▶ $E(T) = 1$

Question No: 12 (Marks: 1) - Please choose one

The best unbiased estimator for population variance is:

- ▶ Sample mean
- ▶ Sample median
- ▶ Sample proportion
- ▶ Sample variance

Question No: 13 (Marks: 1) - Please choose one

The sample variance is:

- ▶ Unbiased estimator of
- ▶ Biased estimator of
- ▶ Unbiased estimator of
- ▶ None of these

Question No: 14 (Marks: 1) - Please choose one

When c is a constant, then $E(c)$ is:

- 1
 - 0
 - c
 - $-c$
-
- ▶ 0
 - ▶ 1
 - ▶ c
 - ▶ $-c$

Question No: 15 (Marks: 1) - Please choose one

If $f(x, y)$ is bivariate probability density function of continuous r.v.'s X and Y then is:

Come & Join Us at www.vustudents.net

- ▶

- ▶

Question No: 16 (Marks: 1) - Please choose one
The analysis of variance technique is a method for :

- ▶ Comparing F distributions
- ▶ Comparing three or more means
- ▶ Measuring sampling error
- ▶ Comparing variances

Question No: 17 (Marks: 1) - Please choose one
The continuity correction factor is used when:

- ▶ The sample size is at least 5
- ▶ Both nP and $n(1-P)$ are at least 30
- ▶ A continuous distribution is used to approximate a discrete distribution
- ▶ The standard normal distribution is applied

Question No: 18 (Marks: 1) - Please choose one
Stem and leaf is more informative when data is :

- ▶ Equal to 100
- ▶ Greater Than 100
- ▶ Less than 100
- ▶ In all situations

Question No: 19 (Marks: 1) - Please choose one
The branch of Statistics that is concerned with the procedures and methodology for obtaining valid conclusions is called:

- ▶ Descriptive Statistics
- ▶ Advance Statistics
- ▶ Inferential Statistics
- ▶ Sampled Statistics

Question No: 20 (Marks: 1) - Please choose one
Which of the following is a systematic arrangement of data into rows and columns?

- ▶ Classification
- ▶ Tabulation

- ▶ Bar chart
- ▶ Component bar chart

Question No: 21 (Marks: 1) - Please choose one
In normal distribution Q.D =

- ▶
- ▶
- ▶
- ▶

Question No: 22 (Marks: 1) - Please choose one
In normal distribution

- ▶ 1
- ▶ 2
- ▶ 3
- ▶ 0

Question No: 23 (Marks: 1) - Please choose one
If you connect the mid-points of rectangles in a histogram by a series of lines that also touches the x-axis from both ends, what will you get?

- ▶ Ogive
- ▶ Frequency polygon
- ▶ Frequency curve
- ▶ Histogram

Question No: 24 (Marks: 1) - Please choose one
Which one of the following statements is true regarding a population?

- ▶ It must be a large number of values
- ▶ It must refer to people
- ▶ It is a collection of individuals, objects, or measurements
- ▶ It is small part of whole

Question No: 25 (Marks: 1) - Please choose one
When ,what is the value of Median, if the distribution is symmetrical:

- ▶ 1
- ▶ 2
- ▶ 3
- ▶ 4

Question No: 26 (Marks: 1) - Please choose one
In a simple linear regression model, if it is assumed that the intercept parameter is equal to zero, then:

- ▶ The regression line will pass through the origin
- ▶ The regression line will pass through the point (0,10).

- ▶ The regression line will pass through the point (0,-10).
- ▶ The slope of the line will also be equal to 0.

Question No: 27 (Marks: 1) - Please choose one
The degrees of freedom for a t-test with sample size 10 is:

- ▶ 5
- ▶ 8
- ▶ 9
- ▶ 10

Question No: 28 (Marks: 1) - Please choose one
In testing of hypothesis, we always begin it with assuming that:

- ▶ Null hypothesis is true
- ▶ Alternative hypothesis is true
- ▶ Sample size is large
- ▶ Population is normal

Question No: 29 (Marks: 1) - Please choose one
A failing student is passed by an examiner is an example of:

- ▶ Type I error
- ▶ Type II error
- ▶ Correct decision
- ▶ No information regarding student exams

Question No: 30 (Marks: 1) - Please choose one
How to find ?

- ▶ $f(0, 0) + f(0, 1) + f(1, 2)$
- ▶ $f(2, 0) + f(0, 1) + f(1, 0)$
- ▶ $f(0, 0) + f(1, 1) + f(1, 0)$
- ▶ $f(0, 0) + f(0, 1) + f(1, 0)$

Question No: 1 (Marks: 1) - Please choose one

=.....

10!

- ▶ 362880
- ▶ 3628800
- ▶ 362280
- ▶ 362800

Question No: 2 (Marks: 1) - Please choose one

When E is an impossible event, then P(E) is:

Come & Join Us at www.vustudents.net

- ▶ 2
- ▶ 0
- ▶ 0.5
- ▶ 1

Question No: 3 (Marks: 1) - Please choose one

_____ The value of χ^2 can never be :

- ▶ Zero
- ▶ Less than 1
- ▶ Greater than 1
- ▶ Negative

Question No: 4 (Marks: 1) - Please choose one

_____ The curve of the F- distribution depends upon:

- ▶ Degrees of freedom
- ▶ Sample size
- ▶ Mean
- ▶ Variance

Question No: 5 (Marks: 1) - Please choose one

_____ If X and Y are

random variables, then $E(X - Y)$ is equal to:

- ▶ $E(X) + E(Y)$
- ▶ $E(X) - E(Y)$
- ▶ $X - E(Y)$
- ▶ $E(X) - Y$

Question No: 6 (Marks: 1) - Please choose one

_____ In testing hypothesis, we always begin it with assuming that:

- ▶ Null hypothesis is true
- ▶ Alternative hypothesis is true
- ▶ Sample size is large
- ▶ Population is normal

Question No: 7 (Marks: 1) - Please choose one

Come & Join Us at www.vustudents.net

For the

$$\frac{1^{-0.135} 0.135^1}{1!}$$

Poisson distribution $P(x) =$ the mean value is :

- ▶ 2
- ▶ 5
- ▶ 10
- ▶ 0.135

Question No: 8 (Marks: 1) - Please choose one

When two coins are tossed simultaneously, P (one head) is:

- ▶ $\frac{1}{4}$
- ▶ $\frac{1}{2}$
- ▶ $\frac{3}{4}$
- ▶ 4
- ▶ 1

Question No: 9 (Marks: 1) - Please choose one

From point estimation, we always get:

- ▶ Single value
- ▶ Two values
- ▶ Range of values
- ▶ Zero

Question No: 10 (Marks: 1) - Please choose one

The sample

$$s^2 = \frac{\sum(x - \bar{x})^2}{n}$$

variance is:

- ▶ Unbiased estimator of σ^2

► Biased estimator of σ^2

► Unbiased estimator of μ

► None of these

Question No: 11 (Marks: 1) - Please choose one

_____ $\text{Var}(4X + 5)$
= _____

► $16 \text{Var}(X)$

► $16 \text{Var}(X) + 5$

► $4 \text{Var}(X) + 5$

► $12 \text{Var}(X)$

Question No: 12 (Marks: 1) - Please choose one

_____ When $f(x, y)$
is bivariate probability density function of continuous r.v.'s X and Y, then

$$\int_{-\infty}^{\infty} \int_{-\infty}^{\infty} f(x, y) dx dy$$

is equal to:

► 1

► 0

► -1

► ∞

Question No: 13 (Marks: 1) - Please choose one

_____ The area
under a normal curve between 0 and -1.75 is

► .0401

► .5500

► .4599

► .9599

Question No: 14 (Marks: 1) - Please choose one

_____ When a fair
die is rolled, the sample space consists of:

► 2 outcomes

► 6 outcomes

► 36 outcomes

► 16 outcomes

Come & Join Us at www.vustudents.net

Question No: 15 (Marks: 1) - Please choose one

_____ When testing for independence in a contingency table with 3 rows and 4 columns, there are _____ degrees of freedom.

- ▶ 5
- ▶ 6
- ▶ 7
- ▶ 12

Question No: 16 (Marks: 1) - Please choose one

_____ The F- test statistic in one-way ANOVA is:

- ▶ SSW / SSE
- ▶ MSW / MSE
- ▶ SSE / SSW
- ▶ MSE / MSW

Question No: 17 (Marks: 1) - Please choose one

_____ The continuity correction factor is used when:

- ▶ The sample size is at least 5
- ▶ Both nP and $n(1-P)$ are at least 30
- ▶ A continuous distribution is used to approximate a discrete distribution
- ▶ The standard normal distribution is applied

Question No: 18 (Marks: 1) - Please choose one

_____ A uniform distribution is defined by:

- ▶ Its largest and smallest value
- ▶ Smallest value
- ▶ Largest value
- ▶ Mid value

Question No: 19 (Marks: 1) - Please choose one

_____ Which graph is made by plotting the mid point and frequencies?

- ▶ Frequency polygon
- ▶ Ogive
- ▶ Histogram
- ▶ Frequency curve

Question No: 20 (Marks: 1) - Please choose one

Come & Join Us at www.vustudents.net

In a set of 20 values all the values are 10, what is the value of median?

- ▶ 2
- ▶ 5
- ▶ 10
- ▶ 20

<http://www.vustudents.net>
